Design an App

Get mobile with the Salesforce App.

Learn how to use Salesforce for iOS and Android to achieve your mobile workforce business goals. This Accelerator will help you identify use cases for the Salesforce mobile app. Our experts will then help you design and build a mockup of the Salesforce app customized to your needs.

What it can do for you

· Increase employee efficiency through mobile-providing on-par capabilities for the mobile workforce

· Reduce time between idea and solution

How It Works

A Certified Specialist will guide you through the process via four calls totaling 6 hours over 2 weeks.

Discovery

· Introduce an iterative and user-focused approach to designing for mobile

· Identify and explore foundational mobile use cases for your organization through a facilitated workshop

· Review current implementation, if applicable

Delivery

· Build lo-fidelity mockups

· Document workshop summary

Outcomes

· Propose an application flow, demonstrating how to implement your selected mobile use case using only declarative capabilities within Salesforce

· A set of wireframes/mockups illustrating what the above screens would look like

ADDITIONAL INFORMATION

Premier or Signature

Time you will spend on this Accelerator: 6 hours

GOAL

Minimize operating costs.

INTENDED USER

You are seeking to drive increased business value through the mobile capabilities of Salesforce.

PREREQUISITES

· Must have Premier or Signature Success Plan

· Business stakeholder who has launched or is planning to launch Salesforce for iOS and Android and can articulate key business processes

· No security-related blockers to deployment of Salesforce for iOS and Android, including Mobile Device Management requirements

· Committed Salesforce administrator and change management resources
