Strengthen your Salesforce development process.

Learn how to make Salesforce development more effective and reliable. This Accelerator will teach you how to apply software practices to speed up development, align with corporate processes, and reduce IT costs.

What it can do for you

- Reduce time between idea and solution
- Increase agility of IT platforms and systems
- Increase alignment with business requirements
- Increase release velocity

How it works

A Certified Specialist will guide you through the process via three calls totaling 5 hours over 3 to 5 weeks:

Educate and Prepare

- Understanding software development lifecycle overall
- Overview of traditional development process as it relates to Salesforce
- Introduction to agile and scrum software development methodologies
- Overview of Salesforce development best practices
- Discussion of environmental and testing management
- Discussion of release management

Outcomes

- High level best practices on how to develop Salesforce solutions
- Understanding of the available Salesforce tools to help

Agenda

- Introduction
- Development Methodology
- Environmental Management
- Development & Testing
- Coding & Configuration
- Release Management

Additional Information
