

Workplace Command Center

Assess Return-to-Work Readiness From a Single Hub

Manage health, safety, and preparedness as you return to the workplace. As businesses prepare to reopen, many teams must work together to ensure offices can open safely. Streamlined communication and visibility into relevant data will be critical in helping companies make informed decisions and manage risk. The Workplace Command Center is a company's single-pane-of-glass for managing the complexities associated with reopening their organizations and getting employees back to work, safely.

MAKE DATA DRIVEN DECISIONS

Access a single hub for leaders to make informed decisions based on public and private data.

TRACK EMPLOYEE AND WORKPLACE READINESS

Monitor and manage employee wellness, shift scheduling, and preparedness.

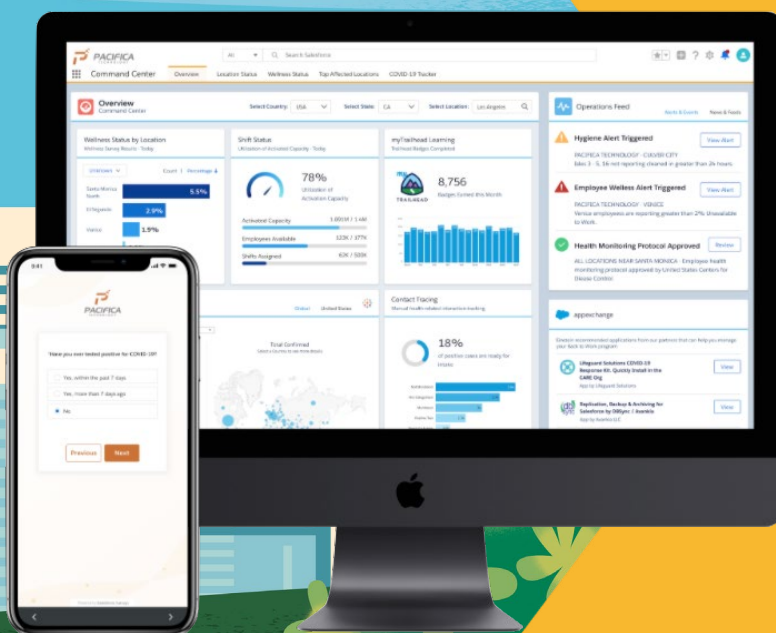

ACT QUICKLY BASED ON INSIGHTS

Create and customize workflows, apps, and actions for resuming operations.

INTEGRATE DATA AND APPLICATIONS

Unlock, analyze, and act upon trusted data and extend with partner apps.

Manage health, safety, and preparedness to reopen

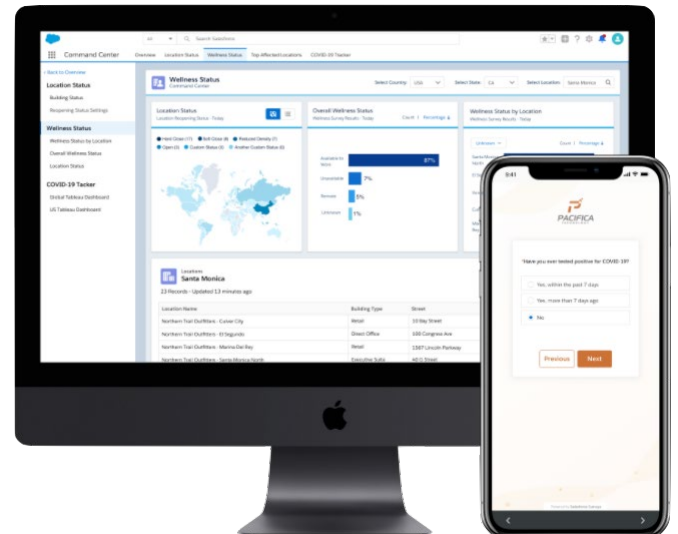

The Work.com Workplace Command Center empowers executives and those managing returning employees to the workplace to make data-driven decisions based on real-time, tailored, public health data, as well as private data about their company and employees. Monitor employee wellness and training information, as well as track facilities preparedness and shift scheduling.
