10 SIMPLE STEPS TO MOVE YOUR USERS

1. **RUN THE READINESS CHECK**
   Check the Readiness Report to see which profile is most ready for Lightning Experience.

2. **PICK A CHAMPION**
   For that profile, elect someone who uses Salesforce the most and has recommendations to make the experience better.

3. **GIVE ACCESS TO THE CHAMPION**
   Create a permission set with the Lightning Experience User permission and assign it to the champion. Then turn on Lightning Experience.

4. **TRAIN THE CHAMPION**
   Prepare the champion to work in Lightning Experience. Sit next to them as they get started and help with any questions. Resolve issues quickly to make good use of the champion’s time.

5. **GIVE IT A WEEK**
   Ask the champion to do their job in Lightning Experience for a week. (Assure them there’s no risk as they can always switch back to Salesforce Classic).

6. **GET FEEDBACK**
   Get the champion’s input on what’s good and what needs attention.

7. **FIX PRIORITY ISSUES**
   Focus on business-stopping issues from your champion and Readiness Report.

8. **BOOST PRODUCTIVITY**
   Enable a Lightning Experience-only feature that’s game-changing for the profile. Do more if you have time.

9. **GO LIVE!**
   Grant everyone else with the same profile access to Lightning Experience.

10. **RINSE AND REPEAT**
    Rinse and repeat with other profiles, working your way up to the most complex cases.

Moving users to Lightning Experience does not have to be an all-or-nothing process. We recommend rolling out in phases, leveraging feedback from Salesforce champions as you go.

Get started with the Lightning Experience Transition Assistant! It’s your one-stop shop for all recommended transition activities, tools, and resources.

- **FASTER TIME TO MARKET** +50%
3 EASY TIPS TO CEMENT USER ADOPTION

Keep in mind, the steps above get you 20% of the way there. The other 80% of the transition—and what’s essential to cementing user adoption—is a good change management strategy. Use the Change Management Hub for tools and help. Start with these simple tips:

COMMUNICATE
Communicate why you’re moving to Lightning Experience. Help your teams understand the productivity gains they’ll get with the many cool features available only in Lightning Experience.

CREATE CHEAT SHEETS
Create simple training materials with screenshots and details that show how common Salesforce activities are a little different in Lightning Experience. A good example is using the Kanban board.

SHOW CREDIBILITY
For better credibility, have your champion(s) deliver your Lightning Experience training instead of your training or enablement team. The champion is already on board with Lightning Experience and can help everyone else see the value of making the change.

THE JOURNEY TO LIGHTNING EXPERIENCE
Here’s your itinerary for completing a successful transition.

ONE FINAL NOTE
Your champions will make sure Lightning Experience is configured optimally for each of their teams, be your ears on the floor, and help answer questions that arise as they happen. And best of all, the champion model scales indefinitely without requiring extra resources.
