Salesforce’s Corporate Trust Commitment
Salesforce is committed to achieving and maintaining the trust of our customers. Integral to this mission is providing a robust security and privacy program that carefully considers data protection matters across our suite of services, including protection of Customer Data as defined in Salesforce’s Master Subscription Agreement.

Services Covered
This documentation describes the architecture of the security- and privacy-related audits and certifications received for, and the administrative, technical, and physical controls applicable to, the following Salesforce Marketing Cloud services (collectively, for the purposes of this document, the “Covered Services”):

- **Advertising Studio**: Services branded or sold as Advertising Studio, Advertising Audiences or Journey Builder Advertising.
- **Datorama**: Services branded or sold as Datorama.
- **ExactTarget**: Services branded or sold as Audience Builder, Automation Studio, Content Builder, Datorama Reports for Marketing Cloud, Email Studio, Journey Builder, Mobile Studio, or Web Studio.
- **Interaction Studio (Legacy)**: Services branded or sold as Interaction Studio. The Services branded as Interaction Studio (Legacy) are also subject to the Heroku documentation as applicable.
- **Interaction Studio**: Services branded or sold as Interaction Studio.
- **Marketing Cloud Einstein**: Services branded or sold as (A) Einstein Recommendations, Einstein Email Recommendations, Einstein Web Recommendations, Predictive Intelligence, Predictive Email, Predictive Web, Web & Mobile Analytics, Web Personalization, Personalization Builder, Einstein Engagement Frequency, Live Weather Block, Einstein Send Time Optimization, Einstein Content Selection, Einstein Content Tagging, Behavioral Triggers and Einstein Messaging Insights.; (B) Einstein Engagement Scoring (formerly branded as Predictive Scoring) and Einstein Copy Insights.
- **Social Studio**: Services branded or sold as Social Studio.
- **Evergage**: Services branded or sold as Evergage, Data Science Workbench, or Data Warehouse.

---

1 The Advertising Studio Services are also subject to the sections of this Documentation applicable to the ExactTarget Services.
2 Datorama Reports for Marketing Cloud runs across two additional infrastructures, the infrastructure described by the sections of this Documentation applicable to Datorama Services, and the infrastructure described by the Einstein Platform Documentation.
3 Applicable to customers purchasing or renewing subscriptions to Interaction Studio (Legacy) on or after October 18, 2018. Customers purchasing Interaction Studio prior to October 18, 2018 purchased Interaction Studio as a Non-Salesforce Application subject to the Terms of Use of Thunderhead (One) Ltd.
4 Applicable to customers purchasing or renewing subscriptions of Interaction Studio hosted by Amazon Web Services, Inc. as indicated in the Infrastructure and Sub-processors for the Salesforce Marketing Cloud Services documentation [here](#).
5 The Covered Services listed in subsection (A) are also subject to the sections of this Documentation applicable to the ExactTarget Services.
6 The Covered Services listed in subsection (B) run across two additional infrastructures, the infrastructure described by the sections of this Documentation applicable to ExactTarget Services, and the infrastructure described by the Einstein Platform Documentation, as further described in the Einstein Platform Documentation.
7 The Services branded as Einstein Vision for Social Studio are also subject to the Einstein Platform Documentation.

Copyright 2000 – 2020 salesforce.com, inc. All rights reserved. Salesforce is a registered trademark of salesforce.com, inc., as are other names and marks. Other marks appearing herein may be trademarks of their respective owners.
Architecture and Data Segregation
The Covered Services are operated in a multitenant architecture that is designed to segregate and restrict Customer Data access based on business needs. The architecture provides an effective logical data separation for different customers via customer-specific unique identifiers and allows the use of customer and user role based access privileges. Additional data segregation is ensured by providing separate environments for different functions, especially for testing and production. The specific infrastructure used to host Customer Data is described in the “Infrastructure and Sub-processors” documentation available here.

Control of Processing
Salesforce has implemented procedures designed to ensure that Customer Data is processed only as instructed by the customer, throughout the entire chain of processing activities by Salesforce and its sub-processors. In particular, Salesforce and its affiliates have entered into written agreements with their sub-processors containing privacy, data protection, and data security obligations that provide a level of protection appropriate to their processing activities. Compliance with such obligations as well as the technical and organizational data security measures implemented by Salesforce and its sub-processors are subject to regular audits. The “Infrastructure and Sub-processors” documentation describes the sub-processors and certain other entities material to Salesforce’s provision of the Covered Services.

Third-Party Functionality
When customers use the Covered Services to transmit or receive mobile messages, such as SMS messages, the content of those messages and related information about those messages are received by: (a) aggregators – entities that act as intermediaries in transmitting mobile messages, and (b) carriers – entities that provide wireless messaging services to subscribers via wireless telecommunication networks. These aggregators and carriers may access, store, and transmit message content and related information to provide these functions.

Audits and Certifications
The following security and privacy-related audits and certifications are applicable to one or more of the Covered Services, as described below:

- **EU-U.S. and Swiss-U.S. Privacy Shield certification**: Customer Data submitted to the ExactTarget, Advertising Studio, Marketing Cloud Einstein, Datorama and Social Studio is within the scope of an annual certification to the EU-U.S. Privacy Shield Framework and the Swiss-U.S. Privacy Shield Frameworks as administered by the U.S. Department of Commerce, as further described in our Privacy Shield Notice. The current certification is available at https://www.privacyshield.gov/list by searching under “Salesforce” for ExactTarget, Advertising Studio, Marketing Cloud Einstein, Datorama and Social Studio.

- **ISO 27001/27017/27018 certification**: Salesforce operates an information security management system (ISMS) for ExactTarget, Advertising Studio, Marketing Cloud Einstein, Datorama and Social Studio in accordance with the ISO 27001 international standard and aligned to ISO 27017 and ISO 27018. Salesforce has achieved ISO 27001/27017/27018 certification for its ISMS from an independent third party. The scope of Salesforce’s ISO 27001/27017/27018 certification is available here.
- **System and Organization Controls (SOC) reports**: Salesforce’s information security control environment applicable to ExactTarget, Advertising Studio, Marketing Cloud Einstein, Datorama, Social Studio Interaction Studio, and Evergage undergoes an independent evaluation in the form of a SOC 2 report. Salesforce’s most recent SOC 2 reports are available upon request from your organization’s Salesforce account executive.

- **TRUSTe certification**: Salesforce’s [Website Privacy Statement](#) and privacy practices related to ExactTarget, Advertising Studio, Marketing Cloud Einstein and Social Studio are assessed by TRUSTe annually, for compliance with TRUSTe’s Certification and Verification Assessment Criteria. For more information on the status of Salesforce's certification/verification status, click [here](#).

- **HITRUST certification**: For the ExactTarget services, Salesforce has obtained HITRUST CSF Certification. A copy of Salesforce’s HITRUST letter of certification is available upon request from your organization’s Salesforce Account Executive.

- **Binding Corporate Rules (BCR) for Processors**: Customer Data submitted to the ExactTarget, Advertising Studio, Marketing Cloud Einstein, Datorama and Social Studio is within the scope of the Salesforce BCR for Processors. The most current version of the Salesforce BCR for Processors is available on Salesforce’s website, currently located [here](#).

- **APEC Privacy Recognition for Processors (PRP)**: Customer Data submitted to the Covered Services is within the scope of Salesforce's PRP certification under the APEC Privacy Framework. The current certification is published in the PRP Compliance Directory at [http://cbprs.org/compliance-directory/prp/](http://cbprs.org/compliance-directory/prp/).

Additionally, the Covered Services undergo security assessments by internal personnel and third parties, which include infrastructure vulnerability assessments and application security assessments, on at least an annual basis.

As further described in the “**Infrastructure and Sub-processors**” documentation, Salesforce uses infrastructure provided by third parties to host Customer Data submitted to certain services. Specifically, Salesforce uses infrastructure provided by Amazon Web Services, Inc. (“AWS”) to host Customer Data submitted to Marketing Cloud Einstein, Datorama, Interaction Studio, and Evergage. Salesforce uses infrastructure provided by Google, LLC (“GCP”) to host Customer Data submitted to ExactTarget. Salesforce uses infrastructure provided by Microsoft Corporation (“Azure”) to host Customer Data submitted to Datorama and Interaction Studio (Legacy). Information about security and privacy-related audits and certifications received by AWS, GCP, and Azure, including ISO 27001 certification and SOC reports, is available from the [AWS Security website](http://aws.amazon.com/security/), the [AWS Compliance website](http://aws.amazon.com/compliance/), the [Google Security website](http://cloud.google.com/security/), the [Google Compliance website](http://cloud.google.com/compliance/), the [Azure Security website](http://cloud.microsoft.com/security/), and the [Azure Compliance website](http://cloud.microsoft.com/compliance/).

### Security Controls

The Covered Services include a variety of security controls. These controls include:

- Unique user identifiers allow customers to assign unique credentials for their users and assign and manage associated permissions and entitlements.
- Controls to ensure initial passwords must be reset on first use.
- Controls to limit password re-use.
- Password length and complexity requirements.
- Customers have the option to vary the complexity, expiration, and challenge questions regarding password security, and to define additional security settings such as account lockout in ExactTarget, Advertising Studio and Marketing Cloud Einstein.
Customers of ExactTarget, Advertising Studio, Interaction Studio (Legacy), Marketing Cloud Einstein, Datorama, and Social Studio have the option to define the range of IP addresses from which their users may access the Covered Services.

Encryption and decryption options for data used to construct email messages and landing pages in ExactTarget.

Email export allowlist functionality enables customers to define which users are able to receive exported material via email from ExactTarget, Interaction Studio, and Evergage.

Customers have the option to manage their application users, and assign or define roles, or apply permissions and rights, within their implementation of the Covered Services.

Where SFTP or FTP uploads are available within the Covered Services, Customers have the ability to use their own external SFTP or FTP accounts to upload customer content to the Covered Services. If a customer desires that Salesforce provide an inbound SFTP account to the customer, the customer sets its own password for that account. Customers of ExactTarget, Advertising Studio, Marketing Cloud Einstein, and Social Studio may also request Login IP Allowlisting for a Salesforce-provisioned SFTP account by contacting their support representative. Inbound SFTP accounts are otherwise not subject to the security controls, procedures, or policies in this document.

Some Covered Services use AWS, GCP, or Azure, as described above; further information about security provided by AWS, GCP, and Azure is available from the AWS Security website, including AWS's overview of security processes, the Google Security website, the Google Compliance website, and the Azure Security website.

Security Policies and Procedures
The Covered Services are operated in accordance with the following policies and procedures to enhance security:

- User passwords are stored using a salted hash format and are not transmitted unencrypted.
- Social account OAuth tokens used within Social Studio are encrypted with a minimum of 128-bit AES encryption.
- User access log entries will be maintained, containing date, time, URL executed or identity ID operated on, operation performed (accessed, created, edited, deleted, etc.) and source IP address.
- If there is suspicion of inappropriate access to the Covered Services, Salesforce can provide customers log entry records to assist in forensic analysis. This service will be provided to customers on a time and materials basis.
- User access logs will be stored in a secure centralized host to prevent tampering.
- User access logs will be kept for a minimum of 90 days.
- Salesforce personnel will not set a defined password for a user.

Intrusion Detection
Salesforce, or an authorized independent third party, will monitor the Covered Services for unauthorized intrusions using network-based intrusion detection mechanisms. Salesforce may analyze data collected by users’ web browsers (e.g., device type, screen resolution, time zone, operating system version, browser type and version, system fonts, installed browser plugins, enabled MIME types, etc.) for security purposes, including to prevent fraudulent authentications, and to ensure that the Covered Services function properly.
Security Logs
All Salesforce systems used in the provision of the Covered Services, including firewalls, routers, network switches and operating systems, log information to their respective system log facility or a centralized syslog server (for network systems) in order to enable security reviews and analysis.

Incident Management
Salesforce maintains security incident management policies and procedures. Salesforce notifies impacted customers without undue delay of any unauthorized disclosure of their respective Customer Data by Salesforce or its agents of which Salesforce becomes aware to the extent permitted by law.

User Authentication
Access to the Covered Services requires a valid user ID and password combination, which are encrypted via TLS while in transmission, as well as machine specific information for identity validation as described under “Security Controls,” above. Following a successful authentication, a random session ID is generated and stored in the user’s browser to preserve and track session state.

Physical Security
Production data centers used to provide the Covered Services have access control systems. These systems permit only authorized personnel to have access to secure areas. These facilities are designed to withstand adverse weather and other reasonably predictable natural conditions, are secured by guards, two-factor access screening, and escort-controlled access, and are also supported by on-site backup generators in the event of a power failure.

Reliability and Backup
All infrastructure components are configured in a high availability mode or in a redundant fashion. All Customer Data submitted to the Covered Services is stored on infrastructure that supports high availability and is backed up on a regular basis. This backup data for ExactTarget, Advertising Studio, Marketing Cloud Einstein and Interaction Studio (Legacy) is retained for 90 days. Backup data for Datorama is retained for 30 days and backup data for Social Studio is retained as needed to provide business continuity. Backup data for Interaction Studio and Evergage is retained as needed to provide business continuity, generally for a period of 1-30 days.

Disaster Recovery
The Covered Services’ production systems are protected by disaster recovery plans which provide for backup of critical data and services. A comprehensive system of recovery processes exists to bring business-critical systems back online within the briefest possible period of time. Recovery processes for database security, systems administration, and network configuration and data provide a roadmap for personnel to make processes available after an outage.

ExactTarget, Marketing Cloud Einstein, Social Studio, Datorama, Interaction Studio (Legacy), Interaction Studio and Evergage use secondary facilities that are geographically diverse from their primary data centers, along with required hardware, software, and internet connectivity, in the event production facilities at the primary data centers were to be rendered unavailable.

Viruses
The Covered Services have controls in place that are designed to prevent the introduction of viruses to these Services’ respective platforms. Uploaded attachments that are found to contain a virus will not be
executed in Advertising Studio and ExactTarget, and will not be stored in Social Studio and Interaction Studio (Legacy). Uploaded attachments are not executable in Marketing Cloud Einstein, Interaction Studio (Legacy), Social Studio, Datorama, Interaction Studio, and Evergage and therefore will not damage or compromise the online Marketing Cloud Einstein, Interaction Studio (Legacy), Social Studio, Datorama, Interaction Studio or Evergage services by virtue of containing a virus. Additionally, Social Studio may pull in information from the Internet and links to other websites that may contain malicious content, but such websites are not executable in Social Studio.

**Data Encryption**
The Covered Services use, or enable customers to use, industry-accepted encryption products to protect Customer Data and communications during transmissions between a customer’s network and the Covered Services including through Transport Layer Encryption (TLS) leveraging at least 2048-bit RSA server certificates and 128 bit symmetric encryption keys at a minimum.

**Return of Customer Data**
During the contract term, customers may export a copy of any Customer Data that is made available for export through the Covered Services. Within 30 days of termination of the applicable Covered Service, customers may 1) request return of Customer Data submitted to Advertising Studio, Interaction Studio (Legacy), or Social Studio by contacting marketingcloudsupport@salesforce.com; 2) access their account to export or download Customer Data submitted to ExactTarget; or 3) contact their account manager to download or export reports generated by Marketing Cloud Einstein or Datorama or Customer Data submitted to Interaction Studio, or Evergage and engage Salesforce professional services to recover any raw data processed by Marketing Cloud Einstein that has not already been deleted.

**Deletion of Customer Data**
After termination of the ExactTarget, Marketing Cloud Einstein, Advertising Studio, Interaction Studio (Legacy), Interaction Studio, or Evergage services, following the 30-day period for return of Customer Data, Customer Data submitted to such services is retained in inactive status for up to 90 days, after which it is securely overwritten or deleted. After termination of the Social Studio or Datorama services, following the 30-day period for return of Customer Data, Customer Data submitted to Social Studio or Datorama is retained in inactive status for up to 60 days, after which it is securely overwritten or deleted. For all Covered Services, back-up data may be retained for an additional 90 days after deletion of Customer Data, after which it is securely overwritten or deleted.

This process is subject to applicable legal requirements. Without limiting the ability for customers to request return of their Customer Data submitted to the Covered Services, Salesforce reserves the right to reduce the number of days it retains such data after contract termination. Salesforce will update this Salesforce Marketing Cloud Security, Privacy and Architecture Documentation in the event of such a change.

**Sensitive Data**
**Important:** The following types of sensitive personal data may not be submitted to the Covered Services: Government-issued identification numbers; and financial information (such as credit or debit card numbers, bank account numbers, and any related security codes or passwords).

---

8 In the case of Advertising Studio services which are not terminated at the same time as ExactTarget services are terminated, customers may request deletion of Customer Data submitted to the Advertising Studio services by contacting marketingcloudsupport@salesforce.com.
Additionally, for the Covered Services, the following types of sensitive personal data may not be submitted: personal health information, where Customer is a health care provider, health care clearinghouse, health plan, or an entity performing functions on behalf of such entities, except in limited circumstances where, subject to restrictions, Salesforce has expressly permitted such submission contractually.

If Customer does submit personal health information or other sensitive or regulated data to the Covered Services, then Customer is responsible for ensuring that its use of the Covered Services to process that information complies with all applicable laws and regulations.

For clarity, the foregoing restrictions do not apply to financial information provided to Salesforce or any Covered Service for the purposes of checking the financial qualifications of, and collecting payments from its customers, the processing of which is governed by Salesforce’s Website Privacy Statement.

Analytics
Salesforce may track and analyze the usage of the Covered Services for purposes of security and helping Salesforce improve both the Covered Services and the user experience in using the Covered Services. For example, we may use this information to understand and analyze trends or track which of our features are used most often to improve product functionality.

Salesforce may share anonymous usage data with Salesforce’s service providers for the purpose of helping Salesforce in such tracking, analysis and improvements. Additionally, Salesforce may share such anonymous usage data on an aggregate basis in the normal course of operating our business; for example, we may share information publicly to show trends about the general use of our services.

Additionally, Salesforce uses Customer Data consisting of data and metrics derived from customer’s websites and social accounts with third-party social platforms, such as geographic location, time of day of use, greatest period of use by industry, and other metrics including spend rates or click rates by geographic location and by industry to create an aggregated and anonymized data set (“Anonymized Data”). No Customer Data consisting of personally identifiable information is contained in the Anonymized Data, nor any data that would identify customers, their users, customers’ clients, or any individual, company or organization. Salesforce combines the Anonymized Data with that of other customers to create marketing reports and to provide product features. By using the Covered Services, customers consent to the use and disclosure of their Customer Data to create reports from the Anonymized Data.

Interoperation with Other Services
The Covered Services may interoperate or integrate with one another, and with other services provided by Salesforce or third parties. Security, Privacy and Architecture documentation for such services provided by Salesforce is available in the Trust and Compliance Documentation. Salesforce also provides a variety of platforms and features that allow Salesforce users to learn about Salesforce products, participate in communities, connect third-party applications, and participate in pilots, testing, and assessments, which are outside the scope of this documentation. Salesforce may communicate with users that participate in such platforms and features in a manner consistent with our Privacy Statement. Additionally, Salesforce may contact users to provide transactional information about the Covered Services; for instance, through the Adoption Manager program or through system-generated messages, such as Chatter notifications. Salesforce offers customers and users the ability to deactivate or opt out of receiving such messages.
