This Change Log reflects changes to the Trust & Compliance Documentation starting May 29, 2020.

Changes prior to this date are available on our Release Notes page. From the Product Areas list, choose Doc Content, then Trust and Compliance Documentation. For prior Release Notes, use the drop-down menu at the top of the page to navigate to the release.
Audience Studio and Data Studio

January 8, 2021

Information & Sub-processors

- No changes

Notices & License Information

- **Purpose of This Documentation**: Clarified that this documentation covers any third-party or publicly sourced information made available to users via Audience Studio.
- **Use of Third-Party Data**: Redefined “Third-Party Data” as Shared Data, as defined in the Audience Studio Order Form. Clarified that the terms contained in this section are not required by providers of Third-Party Data.

Security, Privacy & Architecture

- **Audits and Certifications**: Reference to UK BCR added and link updated.

September 11, 2020

Information & Sub-processors

- No changes

Notices & License Information

- No changes

Security, Privacy & Architecture

- **Audits and Certifications**: Updated the link to the scope of Salesforce’s ISO certification applicable to Audience Studio.

May 29, 2020

Notices & License Information

- **Restricted Uses of Information and Compliance with Self-Regulatory Programs**: Clarified that sensitive data may not be submitted pseudonymized. Clarified that targeted advertising, based on traffic on sites directed at children, is governed by local applicable law.
- **Use of Third-Party Data**: Clarified that targeted advertising, based on traffic on sites directed at children, is governed by local applicable law.

Security, Privacy & Architecture

- **Deletion of Data**: Terms and timelines for return and destruction or deletion of Customer data were updated.
- **Personal Data and Sensitive Data**: Clarified which users and actions are under the NAI Code of Conduct. Clarified that sensitive data may not be submitted pseudonymized. Clarified that targeted advertising, based on traffic on sites directed at children, is governed by local applicable law.
B2B Commerce
January 8, 2021

Information & Sub-processors
- **Sub-Processors — Customer Data Processing:** Updated the entity name for the UK Salesforce Affiliate. Added SFDC Austria GmbH as a sub-processor.

Notices & License Information
- **Acceptable Use and External-Facing Services Policy:** Updated link to point to the latest version of the Policy.

Security, Privacy & Architecture
- **Audits and Certifications:** Reference to UK BCR added.

September 11, 2020

Information & Sub-processors
- **Scope:** Updated previous versions to which the document is applicable from Version 3.144 to Version 3.97 (from Release 4.11 to Release 3.8) or higher.
- **Sub-Processors — Customer Data Processing:** Removed two sub-processors: Cognizant Technology Solutions U.S. Corporation and Cognizant Technology Solutions Hungary Kft.

Notices & License Information
- **Services Covered:** Updated previous versions to which the document is applicable from Version 3.144 to Version 3.97 (from Release 4.11 to Release 3.8) or higher.

Security, Privacy & Architecture
- **Services Covered:** Updated previous versions to which the document is applicable from Version 3.144 to Version 3.97 (from Release 4.11 to Release 3.8) or higher.
- **Architecture and Data Segregation:** Paragraph describing the option for certain customers to subscribe to B2B Commerce Services hosted on a public cloud provider moved to the Audits and Certifications section.
- **Intrusion Detection:** Clarified who monitors the Covered Services for unauthorized intrusions.
- **Return of Customer Data:** Clarified that some Customer Data may be available for export during the contract term.

May 29, 2020

Security, Privacy & Architecture
- **Sensitive Data:** Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
B2C Commerce / Commerce Cloud

January 8, 2021

Information & Sub-processors

- **Scope**: Sub-processors – Customer Data Processing: Added Austria as a salesforce.com, inc. Affiliate entity country.

Notices & License Information

- **Acceptable Use and External-Facing Services Policy**: Updated link to point to the latest version of the Policy.

Security, Privacy & Architecture

- **Audits and Certifications**: Reference to UK BCR added.
- **Security Policies and Procedures**: Updated the security protocols for password storage.
- **User Authentication**: Updated the security protocols for passwords.

September 11, 2020

Information & Sub-processors

- **Scope**: Clarified that all references to “B2C Commerce Order Management” refer to versions of Order Management released prior to February 19, 2020.

Notices & License Information

- **Services Covered**: Clarified the branding of the Predictive Email service. Differentiated B2C Commerce Order Management and Salesforce Order Management.

Security, Privacy & Architecture

- **Services Covered**: Clarified the branding of the Predictive Email service. Differentiated B2C Commerce Order Management and Salesforce Order Management.
- **Security Controls**: Clarified that the list of provided controls may be larger than those documented herein.

May 29, 2020

Information & Sub-processors

Notices & License Information

Security, Privacy & Architecture

- Added link to Salesforce Order Management documentation.
- **Audits and Certifications**: Updated link locations for Salesforce’s AoC, ISO, and SOC reports.
- **Sensitive Data**: Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
Customer 360 Audiences
Customer 360 Audiences shares a SPARC document with Salesforce Unified Cloud Infrastructure. Therefore, some changes may be unrelated to services branded as Customer 360 Audiences.

January 8, 2021

Information & Sub-processors
- No changes

Notices & License Information
- No changes

Security, Privacy & Architecture
- Services Covered: Added Einstein Relationship Intelligence.
- Audits & Certifications: Reference to UK BCR added. Noted which audits and certifications applied to Einstein Relationship Intelligence.
- Return of Customer Data: Clarified possible file formats for returned Customer Data. Customer Data may not be available if customer removes packages prior to contract termination.
- Deletion of Customer Data: Customer Data may not be available if customer removes packages prior to contract termination.

January 4, 2021

Information & Sub-processors
- Sub-Processors – Customer Data Storage: Clarified data storage locations for the Americas and APAC regions. Added locations for data storage in the EMEA region. Clarified the data center locations used for redundancy.

October 19, 2020

Initial Publication of Customer 360 Audiences Trust & Compliance Documentation
Customer 360 Data Manager

January 8, 2021

Information & Sub-processors
- **Scope: Sub-processors – Customer Data Processing:** Added Austria as a salesforce.com, inc. Affiliate entity country.

Notices & License Information
- No changes

Security, Privacy & Architecture
- **Audits and Certifications:** Added EU and UK BCR. Added TRUSTe certification.

September 11, 2020

Information & Sub-processors
- **Scope:** In the list of services to which this documentation does not apply, updated the branding of Commerce Cloud to B2C Commerce/Commerce Cloud.
- **Sub-Processors — Customer Data Processing:** Removed two sub-processors: Cognizant Technology Solutions U.S. Corporation and Cognizant Technology Solutions Hungary Kft.

Notices & License Information
- **Services Covered:** Updated the branding of B2C Commerce/Commerce Cloud in the list of services not covered by this documentation.

Security, Privacy & Architecture
- **Services Covered:** Updated the branding of B2C Commerce/Commerce Cloud in the list of services not covered by this documentation.

May 29, 2020

Information & Sub-processors
- **Scope:** Added a link to Salesforce’s Data Processing Addendum for further information on capitalized terms.
- **Sub-processors - Data Storage:** Added a link to Salesforce’s Data Processing Addendum for further information on capitalized terms. Removed a reference and links to AWS security website and security processes.

Notices & License Information
- No material changes

Security, Privacy & Architecture
- **Audits and Certifications:** Removed references to AWS infrastructure used to host Customer Data.
- **Security Controls:** Removed references to AWS security policy.
- **Security Policies and Procedures:** Updated method by which customers may locally save Audit Trail content.
- **Sensitive Data:** Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring processing of submitted data complies with all applicable laws and regulations.
Data.com

January 8, 2021

Information & Sub-processors
- No changes

Notices & License Information
- No changes

Security, Privacy & Architecture
- No changes

September 11, 2020

Information & Sub-processors
- **Scope:** Clarifies that this document does not apply to “Data.com Connect” or “Jigsaw for Salesforce” or “JFS”.
- **Sub-Processors — Customer Data Processing:** Removed two sub-processors: Cognizant Technology Solutions U.S. Corporation and Cognizant Technology Solutions Hungary Kft.

Notices & License Information
- No material changes

Security, Privacy & Architecture
- **Audits and Certifications:** Added Service to Salesforce’s PRP certification under the APEC Privacy Framework.

May 29, 2020

Information & Sub-processors
- No changes

Notices & License Information
- No changes

Security, Privacy & Architecture
- No changes
Einstein Analytics

Therefore, some changes may be unrelated to services branded as Einstein Analytics.

January 8, 2021

Information & Sub-processors

- **Scope**: Added Experience Cloud and Loyalty Cloud to the list of Covered Services. Updated the list of related products and features that run across two infrastructures and are therefore also covered under additional documentation.
- **Sub-processors – Customer Data Storage**: Added Australia to the list of Amazon Web Services data center locations. Added Amazon Web Services, Inc. in Germany as a sub-processor for Salesforce Maps.
- **Sub-processors – Customer Data Processing**: Updated the entity name for the UK Salesforce Affiliate. Added SFDC Austria GmbH as a sub-processor. Updated the list of services and features utilizing Heroku, Inc. as a sub-processor. Added Amazon Web Service, Inc. as a Service Provider for Service Cloud.
- **Content Delivery Networks**: Added Akamai as a CDN for Lightning Experience.

Notices & License Information

- **Services Covered**: Clarified which Covered Services and features run on more than one infrastructure and thus are subject to the terms of more than one set of documentation.
- **Acceptable Use and External-Facing Services Policy**: Added section specifying that all Covered Services are subject to this Policy.

Security, Privacy & Architecture

- **Services Covered**: Added Loyalty Cloud to the list of Covered Services. Rebranded Community Cloud as Experience Cloud. Clarified Covered and excluded Services. Clarified which Covered Services run on more than one platform.
- **Audits and Certifications**: Reference to UK BCR added and link updated. Clarified which Covered Services and features are included or excluded from listed audits and certifications.
- **Deletion of Customer Data**: Clarified how and when Self-Hosted Data for Salesforce Maps is deleted. Updated the data retention duration, and clarified the deletion terms for Customer Data submitted via Insights Platform.

December 15, 2020

Information & Sub-processors

- **Scope**: Added Intelligent Form Reader and Student Success Hub to the list of Covered Services.
- **Sub-processors – Customer Data Processing**: Added Amazon Web Service, Inc. as a provider for Intelligent Form Reader.

Security, Privacy & Architecture

- **Services Covered**: Added Intelligent Form Reader and Student Success Hub to the list of Covered Services.
- **Audits and Certifications**: Noted which audits and certifications applied to Intelligent Form Reader and Student Success Hub.
- **Reliability and Backup**: Added Intelligent Form Reader and Student Success Hub to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.
- **Sensitive Data**: Additional requirement added for human oversight when using Intelligent Form Reader as part of a decision-making process.
November 17, 2020

Information & Sub-processors

- **Scope**: Added Admissions Connect to the list of Covered Services. Added clarification on how using Salesforce Anywhere (including Quip) Services with Salesforce Services can replicate Customer Data onto Salesforce Anywhere’s AWS-powered infrastructure.

Security, Privacy & Architecture

- **Services Covered**: Added Admissions Connect to the list of Covered Services. Added clarification on how using Salesforce Anywhere (including Quip) Services with Salesforce Services can replicate Customer Data onto Salesforce Anywhere’s AWS-powered infrastructure.
- **Audits and Certifications**: Noted which audits and certifications applied to Admissions Connect. Added Accounting Subledger, Insight Platform, and Nonprofit Cloud Case Management to the scope of Salesforce BCR for Processors.
- **Reliability and Backup**: Added Admissions Connect to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.

November 5, 2020

Information & Sub-processors

- **Scope**: Added Grants Management to the list of Covered Services.

Security, Privacy & Architecture

- **Services Covered**: Added Grants Management to the list of Covered Services.
- **Audits and Certifications**: Noted which audits and certifications applied to Grants Management.
- **Reliability and Backup**: Added Grants Management to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.

September 11, 2020

Information & Sub-processors

- **Scope**: “Covered Services” was amended to include both services and managed packages. Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation.
- **Sub-Processors — Customer Data Processing**: Changed “User Guide” to “Documentation”. Removed four sub-processors: Cognizant Technology Solutions U.S. Corporation, Cognizant Technology Solutions Hungary Kft, Environmental Systems Research Institute, Inc., and HERE Global B.V. Added Salesforce Private Connect (US only), Shift Management, and the services supported by ClickSoftware, Inc. to the list of services being processed by Amazon Web Services, Inc.

Notices & License Information

- **Services Covered**: Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation.
- **Salesforce Essentials**: Added notices for third-party applications which interoperate with this Service.
- **Distributed Software**: Added the End User License Agreement / Order Form Supplement for Salesforce Field Service Lightning Mobile App for Android.

Security, Privacy & Architecture

- **Services Covered**: Simplified the description of the Field Service Lightning Covered Service. Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation. Removed reference to Insights Platform running on both Heroku platform and AWS.
- **Third-Party Functionality**: More clearly defined the Account Intelligence feature in Sales Cloud.
- **Audits and Certifications**: Updated the Services covered or excluded by the listed audits and certifications. Updated the list of Services using Amazon Web Services, Inc.’s or Heroku’s infrastructures to host or process Customer Data.
- **Security Controls**: Updated the list of Services subject to Amazon Web Services, Inc.’s or Heroku’s security documentation.
- **Incident Management**: Updated the link to the Salesforce Trust website.
- **User Authentication**: Clarified that Community Cloud guest users are not required to authenticate with one of the listed methods when accessing that Service.
- **Disaster Recovery**: Clarified that this section does not apply to Shift Management.
- **Return of Customer Data**: Removed reference to derived data sourced from other Services in use by the Customer.
- **Deletion of Customer Data**: Clarified Salesforce Maps data retention duration.
- **Sensitive Data**: Clarified further the restriction on submission of Protected Health Information (defined under US HIPAA) by customers using covered services that are hosted on public cloud provider’s infrastructure.

**July 24, 2020**

**Notices & License Information**
- Added entities and notices for Workplace Command Center.

**July 21, 2020**

**Information & Sub-processors**
- Updated to add Service Cloud Voice as a Covered Service.
- Updated to add Salesforce Private Connect as a Covered Service.
- Updated to add B2B Commerce on Lightning Experience as a Covered Service.
- **Sub-Processors — Customer Data Processing**: Added Amazon Web Services, Inc. as a processor with locations in the United States, Germany, Australia, Japan, and Ireland. Added Service Cloud Voice to the list of services being processed by Heroku, Inc. and Amazon Web Services, Inc. Added Amazon Web Services, Inc. as a sub-processor, supporting Salesforce Private Connect (US only) and Service Cloud Voice.

**Notices & License Information**
- Updated to add Service Cloud Voice as a Covered Service.
- Updated to add Salesforce Private Connect as a Covered Service.
- Updated to add B2B Commerce on Lightning Experience as a Covered Service.
- **Salesforce Private Connect**: Added notices for third-party applications which interoperate with this Service.
- **Service Cloud Voice with Amazon Connect**: Added notices for third-party applications which interoperate with this Service.

**Security, Privacy & Architecture**
- Updated to add Service Cloud Voice as a Covered Service.
- Updated to add Salesforce Private Connect as a Covered Service.
- Updated to add B2B Commerce on Lightning Experience as a Covered Service.
- **Audits and Certifications**: Updated the Services covered or excluded by the listed audits and certifications. Updated the list of Services using Amazon Web Services, Inc.’s or Heroku’s infrastructures to host or process Customer Data.
- **Security Controls**: Updated the list of Services subject to Amazon Web Services, Inc.’s or Heroku’s security documentation.
June 25, 2020

Notices & License Information

May 29, 2020

Information & Sub-processors

- **Scope:** Added the following additional Covered Services to the scope of this document: Emergency Program Management, Accounting Subledger, Salesforce.org Insights Platform: Data Integrity, Nonprofit Cloud Case Management, Command Center, and Shift Management. Rebranded all instances of Work.com (provisioned before May 1, 2020) as WDC. References to Einstein Discovery Classic were removed. Clarified that document does not apply to B2C Order Management. Clarified that Insights Platform is also subject to the Trust and Compliance Documentation for Heroku. Added a link to Salesforce’s Data Processing Addendum for further information on capitalized terms.

- **Sub-Processors - Customer Data Storage:** In the Americas, added a GS0 (Trials only) Instance in two United States-based Data Centers, which are hosted by salesforce.com, inc. and Amazon Web Services.

- **Sub-Processors - Customer Data Processing:** Insights Platform was added to the list of services that use Heroku, Inc. as a sub-processor. Bugsnag Inc. was added as a sub-processor for Salesforce Maps. Shift Management was added to the list of features that use ClickSoftware, Inc. as a sub-processor.

Notices & License Information

- **Services Covered:** Removed references to older versions of Einstein Discovery.

Security, Privacy & Architecture

- **Services Covered:** Added new services including: Emergency Program Management, Salesforce Order Management, Accounting Subledger, Salesforce.org Insights Platform: Data Integrity, Nonprofit Cloud Case Management, Workplace Command Center, and Shift Management. Differentiates Salesforce Order Management from B2C Commerce Order Management and the documentation that governs each. Clarified which sections of the document apply to Scratch Orgs. Clarifies additional governing documentation for Field Service Lighting feature, the Insights Platform, and services which integrate with the Covered Services. Clarified which versions of Einstein Discovery are included in Covered Services. Rebranded all instances of Work.com (provisioned before May 1, 2020) as WDC.

- **Third-Party Functionality:** Added WhatsApp to the list of over-the-top messaging services.

- **Audits and Certifications:** Updated list of services excluded from each referenced certification. Updated location where customers can access SOC reports. Removed Industry Cloud from the list of products certified by Japan CS Gold. Updated list of services whose data is hosted or processed on AWS infrastructure. Added a section describing Insights Platform use of Heroku’s architecture for hosting or processing data.

- **Security Controls:** Updated list of services using AWS. Added Insights Platform’s use of Heroku, and a link to Heroku’s security documentation.

- **Security Policies and Procedures:** Salesforce will only provide log entry records to assist customers in forensic analysis, when available.

- **Reliability and Backup:** Clarifies which Services’ data may be unrecoverable, if uninstalled by customers.

- **Disaster Recovery:** Clarified that this section does not apply to Click FSL Optimizer.

- **Data Encryption:** Clarifies data transmission methods between data centers.

- **Deletion of Customer Data:** Clarifies duration of data retention for Insights Platform on AWS and Heroku servers.

- **Sensitive Data:** Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive data complies with all applicable laws and regulations.

- **Interoperation with Other Services:** Added description of metadata that may be captured by Salesforce when third-party systems are connected to Covered Services. Addresses protection and use of that data.
Einstein Platform

January 8, 2021

Information & Sub-processors
- Lists alphabetized for ease of use.
- **Scope**: Updated the list of features to which this document applies.
- **Sub-processors – Customer Data Storage**: Added sub-processors for Einstein Recommendation Builder, Account Intelligence, and new features. Clarified Services for which data is processed by both AWS and Heroku. Removed France as a data center location for processing Service Cloud Einstein, Case Classification feature, and Article Recommendation feature. Clarified that, in the future, if Customer Data for Salesforce Services is hosted in EMEA but outside of Europe, the Customer Data on the Einstein Platform for certain features would be hosted in Europe.
- **Sub-processors – Customer Data Processing**: Added Austria as a salesforce.com, inc. Affiliate entity country.

Notices & License Information
- **Services Covered**: Updated the list of features to which this document applies.
- **Distributed Software**: Added link to the Salesforce for Zoom EULA.
- **Notices Applicable to Salesforce Inbox and Einstein Activity Capture**: Clarified which non-SFDC applications are used by all Einstein Activity Capture Customers, and which are only used by Customers with the upgraded Inbox license
- **Notices Applicable to Salesforce Inbox and Einstein Activity Capture – Video Conferencing Integration to Zoom**: Added section describing terms for integrating Salesforce Inbox Services with Zoom products and services.
- **Notices Applicable to Call Coaching (feature of High Velocity Sales) – Video Conferencing Integration to Zoom**: Added section describing terms for integrating Call Coaching with Zoom products and services.

Security, Privacy & Architecture
- Lists alphabetized for ease of use.
- **Services Covered**: Updated the list of features to which this document applies.
- **Covered Services Access Through Other Services**: Defined the term “Underlying Service” to clarify how Einstein Platform interacts with other Services
- **Audits and Certifications**: Reference to UK BCR added. Added Einstein Bots to the list of Services for which SOC 2 reports are applicable.
- **Sensitive Data**: Clarified which types of sensitive personal data cannot be submitted to Covered Services to allow Einstein OCR and Einstein Form Reader features to process government issued identifiers and financial information.

October 23, 2020

Security, Privacy & Architecture
- **Sensitive Data**: Customers which are health care providers, health care clearinghouses, health plans, or an entities performing functions on behalf of such entities may now submit personal health information to Einstein Vision and Language, where Salesforce has expressly permitted such submission contractually.
September 11, 2020

Information & Sub-processors

- **Covered Services Accessed through other Services**: Einstein Copy Insights utilizes Marketing Cloud as an underlying service and is subject to its Documentation. Clarified that all Covered Services, with the exception of Einstein Vision and Language, utilize other underlying Services for backend data science.
- **Sub-processors — Customer Data Storage**: Clarified data storage location for customers of Einstein Engagement Scoring.
- **Sub-Processors — Customer Data Processing**: Removed two sub-processors: Cognizant Technology Solutions U.S. Corporation and Cognizant Technology Solutions Hungary Kft.

Notices & License Information

- **Covered Services Accessed through Other Services**: Einstein Copy Insights is also subject to the Marketing Cloud Documentation
- **Distributed Software**: Added links to applicable Order Form Supplements for GMail and Outlook Integration.
- **Salesforce Inbox**: Removed Third-Party IP to Location Services section
- **Einstein Call Coaching**: Clarified that this is a feature of High Velocity Sales. Clarified types of customer data that Salesforce employees may access and review.

Security, Privacy & Architecture

- **Covered Services Accessed Through Other Services**: Einstein Copy Insights utilizes Marketing Cloud as an underlying service and is subject to its Documentation. Clarified that all Covered Services, with the exception of Einstein Vision and Language, utilize other underlying Services for backend data science.
- **Security Policies and Procedures**: Clarified that all Covered Services, with the exception of Einstein Vision and Language, may be subject to the documentation of underlying services which also have their own Security Policies and Procedures.
- **Intrusion Detection**: Clarified that all Covered Services, with the exception of Einstein Vision and Language, may be subject to the documentation of underlying services which also provide Intrusion Detection.
- **Sensitive Data**: Updated to no longer restrict submission of personal health data to Einstein Case Classification and Einstein Prediction Builder, subject to preconditions; and confirm that customers must ensure their legal compliance when submitting such sensitive personal data to those Services or features.

July 23, 2020

Security, Privacy & Architecture

- **Sensitive Data**: Updates include (1) subject to preconditions, no longer restrict submission of personal health data to Einstein Case Classification and Einstein Prediction Builder; and (2) confirm that customers must ensure their legal compliance when submitting such sensitive personal data to those Services or features.

July 9, 2020

Information & Sub-processors

- Edits to clarify scope of AWS processing environments for the feature branded as Einstein Copy Insights.

Notices & License Information

- Edits to clarify scope of AWS processing environments for the feature branded as Einstein Copy Insights.

Security, Privacy & Architecture

- Edits to clarify scope of AWS processing environments for the feature branded as Einstein Copy Insights.
May 29, 2020

Information & Sub-processors

- **Scope**: Einstein Reply Recommendation added as a new feature of Service Cloud Einstein. Einstein Call Coaching added as a new feature of High Velocity Sales.
- **Branding**: Einstein Vision for Social Studios changed to Einstein Vision for Social Studio throughout.
- **Sub-processors - Customer Data Storage**: Separately listed sub-processor information for Einstein Object Detection as a feature of the Consumer Goods Cloud Service, distinct from Einstein Vision, and added European AWS data center location. Clarified European AWS data center locations for Einstein Prediction Builder, Einstein Article Recommendations, and Einstein Case Classification. Clarified data storage location of European-based Einstein Bots customers who enable the NLP functionality. Clarified storage location of different features for High Velocity Sales customers.

Notices & License Information

- **Audits and Certifications**: Updated list of products excepted from Salesforce’s BCR for processors. Updated list of Einstein features that meet ISO standards. Updated list of features evaluated under SOC.

Security, Privacy & Architecture

- **Services Covered**: Updated to include additional features, Einstein Call Coaching.
- **Salesforce Inbox**: Removed terms specific to Third-Party Contact Enrichment Providers.
- **Einstein Call Coaching**: Added additional terms to Customer’s use of this new feature. Terms also added for integrating Call Coaching features with third-party products and services.
**Government Cloud Plus**

January 8, 2021

**Information & Sub-processors**
- No Changes

**Security, Privacy & Architecture**
- **Sensitive Data:** Removed the stipulation against Customers submitting Federal Taxpayer Information data to Government Cloud Plus.

December 3, 2020

**Security, Privacy & Architecture**
- **Sensitive Data:** Added personal health information as data that must be encrypted through Platform Encryption or Classic Encryption prior to submission to Government Cloud Plus.

September 11, 2020

**Information & Sub-processors**
- **Sub-Processors — Customer Data Storage** and **Sub-Processors — Customer Data Processing:** Clarified that copies of each instance of Government Cloud Plus are located in Virtual Private Clouds in the AWS GovCloud (West) region.

**Security, Privacy & Architecture**
- **Audits and Certifications:** Adding Government Cloud Plus’s FedRAMP High Provisional Authority to Operate (P-ATO) and APEC Privacy Recognition for Processors.
- **Security Policies and Procedures:** Updated the retention duration of system infrastructure and application logs to be in compliance with FedRAMP requirements
- **Incident Management:** Updated the link to the Salesforce Trust website.

May 29, 2020

**Information & Sub-processors**
- **Sub-processors - Customer Data Storage:** Clarified that encrypted customer data may pass through various points on its way to storage and processing on the previously specified hosts.

**Security, Privacy & Architecture**
- **Intrusion Detection:** Examples of data possibly being collected were removed.
- **Data Encryption:** Clarified type of symmetric encryption keys.
- **Sensitive Data:** Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
Heroku

January 8, 2021

Infrastructure & Sub-processors

- **Sub-processors – Customer Data Processing:** Added Austria as a salesforce.com, inc. Affiliate entity country.

Notices and License Information

- **Distributed Software:** Clarified reference to Master Subscription Agreement.

Security, Privacy & Architecture

- **Audits and Certifications:** Reference to UK BCR added.
- **Viruses:** Clarified that attachments and other Customer Data uploaded by the customer are not scanned for viruses.

October 1, 2020

Notices and License Information

- **Restricted Uses:** Line items specific to Limits & Quotas have been moved to a new section by that name. Additional restricted uses were added including bulk account creation, peer-to-peer file sharing, penetration testing, load testing, and security scanning.
- **Third-Party Platforms:** Specified that Salesforce do not endorse any Third-Party Platforms.
- **Heroku Elements Marketplace:** Specified the location of the Heroku Elements Marketplace. Clarified that Heroku Elements are Non-SFDC Applications, unless otherwise expressly specified by Salesforce, and that non-SFDC Heroku Elements are exclusive of any warranty. Noted that Heroku Elements may contain Content, and the terms of a Customer’s agreement with a Heroku Elements provider are solely as agreed between the Customer and the Heroku Elements provider.
- **Distributed Software:** Updated the Heroku Command Line Interface open source license to ISC.
- **External Resources:** This section has been removed. The line items are covered under the Heroku Elements Marketplace and Third-Party Platforms sections.

September 11, 2020

Infrastructure & Sub-processors

- No changes

Notices and License Information

- **Purpose of This Documentation:** Updated the types of interoperable entities addressed in the documentation.
- **Restricted Uses:** Added links to the limits in using Heroku Services. Added unique user login credentials requirements.
- **Third Party Platforms:** Added a section of terms applicable to Third-Party Platforms.
- **Heroku Elements Marketplace:** The Heroku Elements section was renamed Heroku Elements Marketplace.
- **External Resources:** Clarified Salesforce’s responsibilities with regard to external websites or resources.
- **Heroku Services Policies:** The privacy policy reference was removed.
- **Quota & Limits:** This section was deleted in connection with moving the information on hard and soft limits and unique user login requirements to the Restricted Uses section.

Security, Privacy & Architecture

- **Architecture and Data Segregation:** Clarified that “Organization IDs” are customer-specific.
• Intrusion Detection: Clarified the methods by which the Services are monitored for unauthorized intrusions. Updated the uses of analyzing users’ web browser data to include detecting compromised browsers.

• Physical Security: Clarified that only authorized personnel have access to the Heroku Services’ production data centers.

May 29, 2020

Security, Privacy & Architecture

• Audits and Certifications: Updated names of features covered under the PCI certification. Added ASIP Santé certification.
• Disaster Recovery: Updated list of Heroku Shield services.
• Sensitive Data: Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring processing of submitted data complies with all applicable laws and regulations.
**IoT Cloud**

January 8, 2021

**Infrastructure & Sub-processors**

- **Sub-processors – Customer Data Processing**: Added Austria as a salesforce.com, inc. Affiliate entity country.

**Notices & License Information**

- No changes

**Security, Privacy & Architecture**

Marketing Cloud

January 8, 2021

Information & Sub-processors

- Lists alphabetized for ease of use.
- **Scope**: Added Einstein Engagement Scoring for Mobile to the list of Covered Services.
- **Sub-Processors – Customer Data Storage**: Removed Germany as a data center location for Amazon Web Services, Inc. specific to storage of Evergage and Interaction Studio Customer Data for Customers in the Americas & APAC regions. Removed the United States as a data center location for Amazon Web Services, Inc. specific to storage of Evergage and Interaction Studio Customer Data for customers in the EMEA region.
- **Sub-Processors – Customer Data Processing**: Added Austria as a salesforce.com, inc. Affiliate entity country.

Notices & License Information

- **Services Covered – ExactTarget, Advertising Studio, and Interaction Studio**: Clarified how to determine which version of Interaction Studio Customer is using.
- **Services Covered – Marketing Cloud Einstein**: Added Einstein Engagement Scoring for Mobile to the list of Covered Services. Clarified that Marketing Cloud Einstein is accessed through another Service and is therefore subject to the terms of both Services’ documentation.
- **Covered Services Accessed Through Other Services – Marketing Cloud Einstein**: New section describing the terms under which Customer Data may be transferred between services for processing.

Security, Privacy & Architecture

- Lists alphabetized for ease of use.
- **Services Covered**: Added Einstein Engagement Scoring for Mobile to the list of Covered Services. Clarified how to determine which version of Interaction Studio Customer is using. Defined the term “Underlying Service”.
- **Third-Party Functionality**: Clarified which Covered Service is used to transmit or receive mobile messages.
- **Audits and Certifications**: Reference to UK BCR added and link updated.
- **Return of Customer Data**: Clarified methods to request return of Customer Data for different Covered Services.

December 15, 2020

Notices & License Information

- **ExactTarget, Advertising Studio, and Interaction Studio – Third-Party Notices**: Added GoogleAMP.

December 1, 2020

Information & Sub-processors

- **Scope**: Added Datorama Reports for Marketing Cloud (an Exact Target feature to be released in early 2021) to the list of Covered Services and removed Lead Capture (a Non-SFDC Application/third-party application) from the list of Covered Services. Clarified Services which are also subject to additional documentation.
- **Sub-Processors – Customer Data Storage**: Identified sub-processors for Datorama Reports for Marketing Cloud.
- **Sub-Processors – Customer Data Processing**: Identified sub-processors for Datorama Reports for Marketing Cloud.
Notices & License Information
- **Services Covered**: Added Datorama Reports for Marketing Cloud (an Exact Target feature to be released in early 2021) to the list of Covered Services and removed Lead Capture (a Non-SFDC Application/third-party application) from the list of Covered Services.

Security, Privacy & Architecture
- **Services Covered**: Added Datorama Reports for Marketing Cloud (an Exact Target feature to be released in early 2021) to the list of Covered Services and removed Lead Capture (a Non-SFDC Application/third-party application) from the list of Covered Services. Clarified Services which are also subject to additional documentation.

September 11, 2020
Information & Sub-processors
- Rebranded Predictive Intelligence as Marketing Cloud Einstein and updated references to it throughout.
- **Scope**: Clarified which of Marketing Cloud Einstein’s related services are also subject to additional documentation.
- **Sub-processors — Customer Data Storage**: Clarified for Datorama customers the types of information that may still be processed in AWS.
- **Sub-Processors — Customer Data Processing**: Removed three sub-processors: Cognizant Technology Solutions U.S. Corporation, Cognizant Technology Solutions Hungary Kft, and P.I. Softek, Ltd.

Notices & License Information
- **Marketing Cloud Einstein**: Rebranded Predictive Intelligence as Marketing Cloud Einstein throughout.

Security, Privacy & Architecture
- Rebranded Predictive Intelligence as Marketing Cloud Einstein and updated references to it throughout.
- **Security Controls**: Replaced the term “whitelist” with “allowlist”.
- **Deletion of Customer Data**: Clarifies the duration of retention for customer data pending deletion for all Covered Services.

August 18, 2020
Information & Sub-processors
- Updated to account for changes in branding of Interaction Studio Services.

Notices & License Information
- Updated to account for changes in branding of Interaction Studio Services.
- **ExactTarget, Advertising Studio, and Interaction Studio**: In Services Covered, clarified the Covered Services including the difference between Interaction Studio and Interaction Studio (Legacy). Amended the Interaction Studio section to clarify that it applies to the Legacy version of that Service.
- **Interaction Studio**: New section added with notices and license information specific to this Service.

Security, Privacy & Architecture
- Updated to account for changes in branding of Interaction Studio Services.
- **Audits and Certifications**: Added Interaction Studio to the list of Services which undergo Soc 2 evaluation. Specified that Interaction Studio runs on Amazon Web Services, Inc.’s infrastructure. Clarified that Interaction Studio (Legacy) uses Microsoft Corporation’s “Azure” infrastructure.
- **Security Controls**: Clarified that Interaction Studio (Legacy) customers have the option to define the range of IP addresses from which their users may access Covered Services. Added Interaction Studio to the list of Services for which customers can utilize email export allowlist functionality.
- **Reliability and Backup**: Clarified that Interaction Studio (Legacy) backup data is retained for 90 days. Added that backup data retention for Interaction Studio is generally 1-30 days, as needed.
● **Disaster Recovery**: Added Interaction Studio to the list of Services using geographically diverse, secondary facilities.
● **Viruses**: Added Interaction Studio (Legacy) and Interaction Studio to the list of Services for which uploaded attachments are not executable.
● **Return of Customer Data**: Clarified the methods by which customers of Interaction Studio (Legacy), and Interaction Studio can request, access, or export their data on contract termination.

**July 9, 2020**

**Information & Sub-processors**
- Edits to clarify scope of AWS processing environments for the feature branded as Einstein Copy Insights.

**Notices & License Information**
- Edits to clarify scope of AWS processing environments for the feature branded as Einstein Copy Insights.

**Security, Privacy & Architecture**
- Edits to clarify scope of AWS processing environments for the feature branded as Einstein Copy Insights.

**July 2, 2020**

**Notices & License Information**
- Revised to include the Evergage Services.
  - **Evergage**: New section added with notices and license information specific to this Service.

**Security, Privacy & Architecture**
- Revised to add Evergage as a Covered Service.
  - **Audits and Certifications**: Added Evergage to the list of Services which undergo Soc 2 evaluation. Specified that Evergage runs on Amazon Web Services, Inc.’s infrastructure.
  - **Security Controls**: Added Evergage to the list of Services for which customers can utilize email export allowlist functionality.
  - **Reliability and Backup**: Added that backup data retention for Evergage is generally 1-30 days, as needed.
  - **Disaster Recovery**: Added Evergage to the list of Services using geographically diverse, secondary facilities.
  - **Viruses**: Added Evergage to the list of Services for which uploaded attachments are not executable.
  - **Return of Customer Data**: Clarified the methods by which customers of Evergage can request, access, or export their data on contract termination.

**June 25, 2020**

**Information & Sub-processors**
- Added Evergage to Marketing Cloud I&S and disclosed AWS as a third-party hosting provider.
- Added Snowflake, Inc. as a sub-processor for Datorama. In addition, we have clarified that for Customers that have chosen Azure hosting, limited account information used for the provisioning of accounts may still be processed, but not stored, on AWS.

**May 29, 2020**

**Information & Sub-processors**
- **Scope**: No longer includes Advertising Campaigns as part of Advertising Studio. Marketing Cloud Einstein and Measurement Platform was shortened to Marketing Cloud Einstein. Added a link to Salesforce’s Data Processing Addendum for further information on capitalized terms.
- **Sub-processors - Customer Data Processing**: Israel was added to the list of countries in which salesforce.com, inc. and its associates process customer data. Datorama Technologies Ltd. was removed from the list of sub-processors.
Notices & License Information

- **ExactTarget, Advertising Studio, and Interaction Studio**: Under Services Covered, removed Advertising Campaigns from the list of “Covered Services”. Clarified that Customers are responsible for any material their users provide to Third Party Platforms.
- **Predictive Intelligence**: Under Services Covered, removed iGo Digital and references to iGo, LLC. Rebranded two services, and clarified which services are subject to additional documentation.
- **Social Studio**: Under Command Center - Public Display, removed restrictions on syndication, on conducting analysis, or on creating derivatives from Twitter content.

Security, Privacy & Architecture

- **Services Covered**: No longer includes Advertising Campaigns as part of Audience Studio. Marketing Cloud Einstein and Measurement Platform was shortened to Marketing Cloud Einstein. Updated documentation to which Einstein Engagement Frequency is subject.
- **Audits and Certifications**: Under ISO certification, changed Predictive Intelligence to Marketing Cloud Einstein and Measurement (MCEM).
- **Sensitive Data**: Amended list of unsubmitable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
Messaging and LiveMessage

Therefore, some changes may be unrelated to services branded as either Messaging or LiveMessage.

January 8, 2021

Information & Sub-processors - Messaging

- **Scope**: Added Experience Cloud and Loyalty Cloud to the list of Covered Services. Updated the list of related products and features that run across two infrastructures and are therefore also covered under additional documentation.
- **Sub-processors – Customer Data Storage**: Added Australia to the list of Amazon Web Services data center locations. Added Amazon Web Services, Inc. in Germany as a sub-processor for Salesforce Maps.
- **Sub-processors — Customer Data Processing**: Updated the entity name for the UK Salesforce Affiliate. Added SFDC Austria GmbH as a sub-processor. Updated the list of services and features utilizing Heroku, Inc. as a sub-processor. Added Amazon Web Service, Inc. as a Service Provider for Service Cloud.
- **Content Delivery Networks**: Added Akamai as a CDN for Lightning Experience.

Information & Sub-processors - LiveMessage

- **Scope**: Clarified that Customer Data submitted to myTrailhead also uses Heroku infrastructure to host or process Customer Data.
- **Sub-processors – Customer Data Storage**: Clarified that myTrailhead also uses Heroku infrastructure to store Customer Data.
- **Sub-processors – Customer Data Processing**: Added Austria as a salesforce.com, inc. Affiliate entity country. Clarified that data centers for Heroku, Inc. are located in the United States.
- **Content Delivery Networks**: Defined Content Delivery Networks and described their use.

Notices & License Information - Messaging & LiveMessage

- **Restricted Uses of Information**: Added section addressing potential blocking or filtering of SMS messages by Carriers.

Security, Privacy & Architecture - LiveMessage

- **Services Covered**: Clarified which Covered Services run on more than one platform.
- **Services Covered: Salesforce Anywhere (including Quip) Accessed Through Other Services**: Clarified which sets of documentation apply to this Covered Service.
- **Audits and Certifications**: Reference to UK BCR added.
- **Data Encryption**: Updated the data encryption protocols used to protect Customer Data and communications.
- **Return of Customer Data**: Clarified terms for returning Customer Data per Covered Service.

Security, Privacy & Architecture - Messaging

- **Services Covered**: Added Loyalty Cloud to the list of Covered Services. Rebranded Community Cloud as Experience Cloud. Clarified Covered and excluded Services. Clarified which Covered Services run on more than one platform.
- **Audits and Certifications**: Reference to UK BCR added and link updated. Clarified which Covered Services and features are included or excluded from listed audits and certifications.
• **Deletion of Customer Data:** Clarified how and when Self-Hosted Data for Salesforce Maps is deleted. Updated the data retention duration, and clarified the deletion terms for Customer Data submitted via Insights Platform.

**December 15, 2020**

**Information & Sub-processors - LiveMessage**

- **Scope:** Added Salesforce.org Philanthropy Cloud to the list of Covered Services.
- **Sub-processors – Customer Data Storage:** Added AWS as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Sub-processors – Customer Data Processing:** Added Heroku, Inc. and Mailgun Technologies as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Content Delivery Networks:** Added Fastly, Inc. and Cloudinary Ltd. as sub-processors for Salesforce.org Elevate and Salesforce.org Philanthropy Cloud.

**Information & Sub-processors - Messages**

- **Scope:** Added Intelligent Form Reader and Student Success Hub to the list of Covered Services.
- **Sub-Processors – Customer Data Processing:** Added Amazon Web Service, Inc. as a provider for Intelligent Form Reader.

**Security, Privacy & Architecture - LiveMessage**

- **Services Covered:** Added Salesforce.org Philanthropy Cloud to the list of Covered Services. Noted that Salesforce.org Philanthropy Cloud also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications:** Noted which audits and certifications apply to Salesforce.org Philanthropy Cloud.
- **Return of Customer Data:** Described the method and timing for requesting return of Customer Data for customers of Salesforce.org Philanthropy Cloud.
- **Sensitive Data:** Added the terms under which payment card data may be submitted to Salesforce.org Philanthropy Cloud.

**Security, Privacy & Architecture - Messages**

- **Services Covered:** Added Intelligent Form Reader and Student Success Hub to the list of Covered Services.
- **Audits and Certifications:** Noted which audits and certifications applied to Intelligent Form Reader and Student Success Hub.
- **Reliability and Backup:** Added Intelligent Form Reader and Student Success Hub to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.
- **Sensitive Data:** Additional requirement added for human oversight when using Intelligent Form Reader as part of a decision-making process.

**November 17, 2020**

**Information & Sub-processors - LiveMessage**

- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services:** Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.
Information & Sub-processors - Messaging

- **Scope**: Added Admissions Connect to the list of Covered Services. Added clarification on how using Salesforce Anywhere (including Quip) Services with Salesforce Services can replicate Customer Data onto Salesforce Anywhere's AWS-powered infrastructure.

Security, Privacy & Architecture - LiveMessage

- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.

Security, Privacy & Architecture - Messaging

- **Services Covered**: Added Admissions Connect to the list of Covered Services.
- **Audits and Certifications**: Noted which audits and certifications applied to Admissions Connect. Added Accounting Subledger, Insight Platform, and Nonprofit Cloud Case Management to the scope of Salesforce BCR for Processors.
- **Reliability and Backup**: Added Admissions Connect to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.

November 5, 2020

Information & Sub-processors - Messaging

- **Scope**: Added Grants Management to the list of Covered Services.

Security, Privacy & Architecture - Messaging

- **Services Covered**: Added Grants Management to the list of Covered Services.
- **Audits and Certifications**: Noted which audits and certifications applied to Grants Management.
- **Reliability and Backup**: Added Grants Management to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.

September 11, 2020

Information & Sub-processors - Messaging

- **Scope**: “Covered Services” was amended to include both services and managed packages. Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation.
- **Sub-Processors — Customer Data Processing**: Changed “User Guide” to “Documentation”. Removed four sub-processors: Cognizant Technology Solutions U.S. Corporation, Cognizant Technology Solutions Hungary Kft, Environmental Systems Research Institute, Inc., and HERE Global B.V. Added Salesforce Private Connect (US only), Shift Management, and the services supported by ClickSoftware, Inc. to the list of services being processed by Amazon Web Services, Inc.

Information & Sub-processors - LiveMessages

- **Scope**: Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.

Notices & License Information - Messaging & LiveMessages

- **Services Covered**: Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation.
- **Salesforce Essentials**: Added notices for third-party applications which interoperate with this Service.
• **Distributed Software:** Added the End User License Agreement / Order Form Supplement for Salesforce Field Service Lightning Mobile App for Android.

**Security, Privacy & Architecture - Messaging**

• **Services Covered:** Simplified the description of the Field Service Lightning Covered Service. Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation. Removed reference to Insights Platform running on both Heroku platform and AWS.

• **Third-Party Functionality:** More clearly defined the Account Intelligence feature in Sales Cloud.

• **Audits and Certifications:** Updated the Services covered or excluded by the listed audits and certifications. Updated the list of Services using Amazon Web Services, Inc.’s or Heroku’s infrastructures to host or process Customer Data.

• **Security Controls:** Updated the list of Services subject to Amazon Web Services, Inc’s or Heroku’s security documentation.

• **Incident Management:** Updated the link to the Salesforce Trust website.

• **User Authentication:** Clarified that Community Cloud guest users are not required to authenticate with one of the listed methods when accessing that Service.

• **Disaster Recovery:** Clarified that this section does not apply to Shift Management.

• **Return of Customer Data:** Removed reference to derived data sourced from other Services in use by the Customer.

• **Deletion of Customer Data:** Clarified Salesforce Maps data retention duration.

• **Sensitive Data:** Clarified further the restriction on submission of Protected Health Information (defined under US HIPAA) by customers using covered services that are hosted on public cloud provider’s infrastructure.

**Security, Privacy & Architecture - LiveMessages**

• **Audit and Certifications:** Updated the link to the scope of Salesforce’s ISO certification for Quip and added the certificate number.

• **Security Controls:** Amended certificate types in use to secure site URL access.

• **Intrusion Detection:** Clarified who monitors the Covered Services for unauthorized intrusions.

**July 21, 2020**

**Information & Sub-processors - Messaging**

• Updated to add Service Cloud Voice as a Covered Service.

• Updated to add Salesforce Private Connect as a Covered Service.

• Updated to add B2B Commerce on Lightning Experience as a Covered Service.

• **Sub-Processors — Customer Data Processing:** Added Amazon Web Services, Inc. as a processor with locations in the United States, Germany, Australia, Japan, and Ireland. Added Service Cloud Voice to the list of services being processed by Heroku, Inc. and Amazon Web Services, Inc. Added Amazon Web Services, Inc. as a sub-processor, supporting Salesforce Private Connect (US only) and Service Cloud Voice.

**Notices & License Information - Messaging and LiveMessages**

• No changes

**Security, Privacy & Architecture - Messaging**

• Updated to add Service Cloud Voice as a Covered Service.

• Updated to add Salesforce Private Connect as a Covered Service.

• Updated to add B2B Commerce on Lightning Experience as a Covered Service.

• **Audits and Certifications:** Updated the Services covered or excluded by the listed audits and certifications. Updated the list of Services using Amazon Web Services, Inc.’s or Heroku’s infrastructures to host or process Customer Data.

• **Security Controls:** Updated the list of Services subject to Amazon Web Services, Inc’s or Heroku’s security documentation.
July 30, 2020

Information & Sub-processors - LiveMessages

- **Sub-processors — Customer Data Storage:** Added Salesforce.org Elevate to the list of Covered Services whose data is hosted by AWS.
- **Sub-Processors — Customer Data Processing:** Added two processors for Salesforce.org Elevate: Heroku, Inc. and Mailgun Technologies, Inc. Noted that services provided by Heroku, Inc. are processed by AWS.

Notices & License Information - Messaging and LiveMessages

- No changes

Security, Privacy & Architecture - LiveMessages

- **Scope:** Added Salesforce.org Elevate to the list of “Covered Services”. Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications:** Excluded Salesforce.org Elevate from the scope of Salesforce BCR for Processors, EU-U.S. and Swiss-U.S. Privacy Shield Certification, and APEC Privacy Recognition for Processors. Added the Attestation of Compliance with the Payment Card Industry Data Security Standard for Salesforce.org Elevate.
- **Return of Customer Data:** Described how Salesforce.org Elevate customers can request return of their data upon termination.
- **Sensitive Data:** Clarified when financial information may be submitted to Salesforce.org Elevate.

May 29, 2020

Notices & License Information - Messaging and LiveMessages

- **Restricted Uses of Information:** Added a link to the Acceptable Use and External Facing Services Policy. Consolidated and enhanced the list of principles, best practices or guidelines to which customer must comply to include MMA Global U.S. Consumer Best Practices for Messaging, CTIA Mobile Commerce Compliance Handbook, and U.S. Short Code Registry Best Practices.

Information & Sub-processors - Messaging

- **Scope:** Added the following additional Covered Services to the scope of this document: Emergency Program Management, Accounting Subledger, Salesforce.org Insights Platform: Data Integrity, Nonprofit Cloud Case Management, Command Center, and Shift Management. Rebranded all instances of Work.com (provisioned before May 1, 2020) as WDC. References to Einstein Discovery Classic were removed. Clarified that document does not apply to B2C Order Management. Clarified that Insights Platform is also subject to the Trust and Compliance Documentation for Heroku. Added a link to Salesforce’s Data Processing Addendum for further information on capitalized terms.
- **Sub-Processors - Customer Data Storage:** In the Americas, added a GS0 (Trials only) Instance in two United States-based Data Centers, which are hosted by salesforce.com, inc. and Amazon Web Services.
- **Sub-Processors - Customer Data Processing:** Insights Platform was added to the list of services that use Heroku, Inc. as a sub-processor. Bugsnag Inc. was added as a sub-processor for Salesforce Maps. Shift Management was added to the list of features that use ClickSoftware, Inc. as a sub-processor.

Information & Sub-processors - LiveMessages

- **Sub-processors - Customer Data Storage:** Clarified hosting location options for Quip customers who have purchased Virtual Private Cloud.
- **Sub-processors - Customer Data Processing:** List of countries for Coveo (for myTrailhead) was amended by clarifying that by “European Union” we mean “European Union member states”. Also deleted “Ireland” from the list of countries in which Coveo processes customer data as the European Union was already mentioned as location of processing and Ireland is part of the European Union. A Content Delivery Network (CDN) was added for myTrailhead.
Security, Privacy & Architecture - Messaging

- **Services Covered:** Added new services including: Emergency Program Management, Salesforce Order Management, Accounting Subledger, Salesforce.org Insights Platform: Data Integrity, Nonprofit Cloud Case Management, Workplace Command Center, and Shift Management. Differentiates Salesforce Order Management from B2C Commerce Order Management and the documentation that governs each. Clarified which sections of the document apply to Scratch Orgs. Clarifies additional governing documentation for Field Service Lighting feature, the Insights Platform, and services which integrate with the Covered Services. Clarified which versions of Einstein Discovery are included in Covered Services. Rebranded all instances of Work.com (provisioned before May 1, 2020) as WDC.

- **Third-Party Functionality:** Added WhatsApp to the list of over-the-top messaging services.

- **Audits and Certifications:** Updated list of services excluded from each referenced certification. Updated location where customers can access SOC reports. Removed Industry Cloud from the list of products certified by Japan CS Gold. Updated list of services whose data is hosted or processed on AWS infrastructure. Added a section describing Insights Platform use of Heroku’s architecture for hosting or processing data.

- **Security Controls:** Updated list of services using AWS. Added Insights Platform’s use of Heroku, and a link to Heroku’s security documentation.

- **Security Policies and Procedures:** Salesforce will only provide log entry records to assist customers in forensic analysis, when available.

- **Reliability and Backup:** Clarifies which Services’ data may be unrecoverable, if uninstalled by customers.

- **Disaster Recovery:** Clarified that this section does not apply to Click FSL Optimizer.

- **Data Encryption:** Clarifies data transmission methods between data centers.

- **Deletion of Customer Data:** Clarifies duration of data retention for Insights Platform on AWS and Heroku servers.

- **Sensitive Data:** Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.

- **Interoperation with Other Services:** Added description of metadata that may be captured by Salesforce when third-party systems are connected to Covered Services. Addresses protection and use of that data.

Security, Privacy & Architecture - LiveMessages

- **Services Covered:** Desk.com, Einstein Discover, and SalesforceIQ have been discontinued.

- **Audits and Certifications:** List of services covered by Audits and Certifications has been edited to reflect services covered by this document.

- **User Authentication:** Updated types of identifiers used to manage user’s session.

- **Viruses:** Updated list of services which do not scan for viruses. Added optional virus scanning for Quip customers.

- **Return of Customer Data:** Removed data retrieval methods for discontinued services.

- **Deletion of Customer Data:** Updated list of products for which customer data can be deleted, and the terms and timelines under which it is overwritten or deleted.

- **Sensitive Data:** Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
MuleSoft

January 8, 2021

Information & Sub-processors

- **Scope**: Clarified Covered and excluded Services.
- **Sub-processors — Customer Data Processing**: Added Austria to the list of data center locations for the salesforce.com, inc. entity.

Notices & License Information

- **Services Covered**: Clarified Services Covered per Order Form definitions, and listed the locations of the term definitions used in the document.

Security, Privacy & Architecture

- **Services Covered**: Clarified Services Covered per Order Form definitions.
- **Audits and Certifications**: Reference to UK BCR added and link updated.
- **Security Controls**: Clarified the security controls for customer applications deployed on the MuleSoft Cloud Offerings.
- **Return of Customer Data**: Clarified the terms for returning Customer Data.
- **Deletion of Customer Data**: Clarified the terms for deletion of Customer Data.

September 11, 2020

Information & Sub-processors

- **Sub-processors — Customer Data Processing**: Removed two sub-processors: Cognizant Technology Solutions U.S. Corporation and Cognizant Technology Solutions Hungary Kft. Also removed specific references to MuleSoft, LLC, and Salesforce Argentina S.R.L., and added Argentina to the list of countries in which salesforce.com, inc. and its affiliates process customer data.

Notices & License Information

- **External Resources**: Clarified MuleSoft Services’ and Salesforce’s responsibilities with regards to external sites, resources, and content.

Security, Privacy & Architecture

- **Audits and Certifications**: Updated the link to the scope of Salesforce’s ISO certification for MuleSoft Cloud Offerings and added the certificate number.
- **Malicious Software**: Clarified the circumstances under which MuleSoft Cloud Offerings does not scan for viruses or malicious software.
- **Sensitive Data**: Clarified further the restriction on submission of Protected Health Information (defined under US HIPAA) by customers to name fields and logs for the MuleSoft Cloud Offerings.

May 29, 2020

Information & Sub-processors

- **Sub-processors - Customer Data Processing**: Great Software Laboratory Pvt Ltd and Great Software Laboratory, Inc. were removed from the list of sub-processors.

Notices & License Information

- **Third-Party Platforms**: Clarified Non-SFDC Applications in Anypoint Exchange.
- **Anypoint Service Mesh**: New section clarifying Istio as a Non-SFDC Application or Third-Party Application.

Security, Privacy & Architecture

- **User Authentication**: Clarified credentials used to authenticate and manage user’s session.
• **Data Encryption**: Clarified management and runtime data encryption.

• **Deletion of Customer Data**: Added data retention policy for Transaction Processing Information in MuleSoft Anypoint Partner Manager.

• **Sensitive Data**: Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
myTrailhead

myTrailhead shares an Infrastructure & Sub-processors document and Security, Privacy & Architecture document with LiveMessage, Salesforce Anywhere (including Quip), and Salesforce.org Philanthropy Cloud and Elevate.

Therefore, some changes may be unrelated to services branded as myTrailhead.

January 8, 2021

Information & Sub-processors
- **Scope**: Clarified that Customer Data submitted to myTrailhead also uses Heroku infrastructure to host or process Customer Data.
- **Sub-processors – Customer Data Storage**: Clarified that myTrailhead also uses Heroku infrastructure to store Customer Data.
- **Sub-processors – Customer Data Processing**: Added Austria as a salesforce.com, inc. Affiliate entity country. Clarified that data centers for Heroku, Inc. are located in the United States.
- **Content Delivery Networks**: Defined Content Delivery Networks and described their use.

Notices & License Information
- No changes

Security, Privacy & Architecture
- **Services Covered**: Clarified which Covered Services run on more than one platform.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Clarified which sets of documentation apply to this Covered Service.
- **Audits and Certifications**: Reference to UK BCR added.
- **Data Encryption**: Updated the data encryption protocols used to protect Customer Data and communications.
- **Return of Customer Data**: Clarified terms for returning Customer Data per Covered Service.

December 15, 2020

Information & Sub-processors
- **Scope**: Added Salesforce.org Philanthropy Cloud to the list of Covered Services.
- **Sub-processors – Customer Data Storage**: Added AWS as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Sub-processors – Customer Data Processing**: Added Heroku, Inc. and Mailgun Technologies as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Content Delivery Networks**: Added Fastly, Inc. and Cloudinary Ltd. as sub-processors for Salesforce.org Elevate and Salesforce.org Philanthropy Cloud.

Security, Privacy & Architecture
- **Services Covered**: Added Salesforce.org Philanthropy Cloud to the list of Covered Services. Noted that Salesforce.org Philanthropy Cloud also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications**: Noted which audits and certifications apply to Salesforce.org Philanthropy Cloud.
- **Return of Customer Data**: Described the method and timing for requesting return of Customer Data for customers of Salesforce.org Philanthropy Cloud.
- **Sensitive Data**: Added the terms under which payment card data may be submitted to Salesforce.org Philanthropy Cloud.
November 17, 2020

Information & Sub-processors
- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services:** Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.

Notices & License Information - myTrailhead only
- **Distributed Software:** Added End User License Agreement and/or Order Supplement for Trailhead GO for Android.

Security, Privacy & Architecture
- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services:** Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.

September 11, 2020

Information & Sub-processors
- **Scope:** Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.

Notices & License Information - myTrailhead only
- No material changes

Security, Privacy & Architecture
- **Audit and Certifications:** Updated the link to the scope of Salesforce’s ISO certification for Quip and added the certificate number.
- **Security Controls:** Amended certificate types in use to secure site URL access.
- **Intrusion Detection:** Clarified who monitors the Covered Services for unauthorized intrusions.

July 30, 2020

Information & Sub-processors
- **Sub-processors — Customer Data Storage:** Added Salesforce.org Elevate to the list of Covered Services whose data is hosted by AWS.
- **Sub-Processors — Customer Data Processing:** Added two processors for Salesforce.org Elevate: Heroku, Inc. and Mailgun Technologies, Inc. Noted that services provided by Heroku, Inc. are processed by AWS.

- No changes

Security, Privacy & Architecture
- **Scope:** Added Salesforce.org Elevate to the list of “Covered Services”. Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications:** Excluded Salesforce.org Elevate from the scope of Salesforce BCR for Processors, EU-U.S. and Swiss-U.S. Privacy Shield Certification, and APEC Privacy Recognition for
Processors. Added the Attestation of Compliance with the Payment Card Industry Data Security Standard for Salesforce.org Elevate.

- **Return of Customer Data**: Described how Salesforce.org Elevate customers can request return of their data upon termination.
- **Sensitive Data**: Clarified when financial information may be submitted to Salesforce.org Elevate.

**May 29, 2020**

**Information & Sub-processors**

- **Sub-processors - Customer Data Processing**: List of countries for Coveo (for myTrailhead) was amended by clarifying that by “European Union” we mean “European Union member states”. Also deleted “Ireland” from the list of countries in which Coveo processes customer data as the European Union was already mentioned as location of processing and Ireland is part of the European Union. A Content Delivery Network (CDN) was added for myTrailhead.

**Security, Privacy & Architecture**

- **Audits and Certifications**: List of services covered by Audits and Certifications has been edited to reflect services covered by this document.
- **User Authentication**: Updated types of identifiers used to manage user’s session.
- **Viruses**: Updated list of services which do not scan for viruses. Added optional virus scanning for Quip customers.
- **Return of Customer Data**: Removed data retrieval methods for discontinued services.
- **Deletion of Customer Data**: Updated list of products for which customer data can be deleted, and the terms and timelines under which it is overwritten or deleted.
- **Sensitive Data**: Amended list of unsubmitable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
Pardot

January 8, 2021

Information & Sub-processors

- **Sub-Processors — Customer Data Processing**: Added Austria as a salesforce.com, inc. Affiliate entity country.

Notices & License Information

- No changes

Security, Privacy & Architecture

- **Audits and Certifications**: Reference to UK BCR added.
- **Security Controls**: Clarified which Security Controls apply depending on whether customer has migrated to Salesforce single sign-on.
- **Security Policies and Procedures**: Clarified customer password storage protocols.
- **User Authentication**: Clarified which User Authentication protocols apply depending on whether customer has migrated to Salesforce single sign-on.

September 11, 2020

Information & Sub-processors

- **Scope**: Clarified that some Pardot features run on two infrastructures and are subject to both this Documentation, and the Einstein Platform Documentation.
- **Sub-Processors — Customer Data Processing**: Removed two sub-processors: Cognizant Technology Solutions U.S. Corporation and Cognizant Technology Solutions Hungary Kft.

Notices & License Information

- **Services Covered**: Clarified that some Pardot features run on two infrastructures and are subject to both this Documentation, and the Einstein Platform Documentation.

Security, Privacy & Architecture

- **Services Covered**: Clarified that some Pardot features run on two infrastructures and are subject to both this Documentation, and the Einstein Platform Documentation.
- **Audits and Certifications**: Updated the link to the scope of Salesforce’s ISO certification applicable to Pardot.
- **Security Controls**: Replaced the term “whitelist” with “allowlist”.
- **Reliability and Backup**: Clarified the method of redundant data storage, and the duration of data storage at off-site backup locations.
- **Data Encryption**: Clarified the data encryption methods in use.
- **Deletion of Customer Data**: Clarified the duration of data storage at off-site backup locations.

May 29, 2020

Notices & License Information

- **Third-Party Platforms**: Clarified that Customers are responsible for any material their users provide to Third Party Platforms.
- **Third-Party Notices**: Removed FullContact as an applicable service.

Security, Privacy & Architecture

- **Security Controls**: Updated terms under which Email Login Verification is required. Clarified description of Email Login Verification.
- **Viruses**: Section and subject renamed Malicious Software.
● **Data Encryption**: TLS version updated.
● **Sensitive Data**: Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
Salesforce Anywhere (including Quip)

Therefore, some changes may be unrelated to services branded as Salesforce Anywhere (including Quip).

January 8, 2021

Information & Sub-processors

- **Scope**: Clarified that Customer Data submitted to myTrailhead also uses Heroku infrastructure to host or process Customer Data.
- **Sub-processors – Customer Data Storage**: Clarified that myTrailhead also uses Heroku infrastructure to store Customer Data.
- **Sub-processors – Customer Data Processing**: Added Austria to the list of data center locations for the salesforce.com, inc. entity. Clarified that data centers for Heroku, Inc. are located in the United States.
- **Content Delivery Networks**: Defined Content Delivery Networks and described their use.

Notices & License Information – Salesforce Anywhere (including Quip) only

- **Third-Party Platforms**: Removed Crashlytics App, Hackpad API, and IFTTT App; added Bitmoji to the list of third-party platforms which Salesforce Anywhere (including Quip) may interact with.

Security, Privacy & Architecture

- **Services Covered**: Clarified which Covered Services run on more than one platform.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Clarified which sets of documentation apply to this Covered Service.
- **Audit and Certifications**: Reference to UK BCR added.
- **Data Encryption**: Updated the data encryption protocols used to protect Customer Data and communications.
- **Return of Customer Data**: Clarified terms for returning Customer Data per Covered Service.

December 15, 2020

Information & Sub-processors

- **Scope**: Added Salesforce.org Philanthropy Cloud to the list of Covered Services.
- **Sub-processors – Customer Data Storage**: Added AWS as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Sub-processors – Customer Data Processing**: Added Heroku, Inc. and Mailgun Technologies as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Content Delivery Networks**: Added Fastly, Inc. and Cloudinary Ltd. as sub-processors for Salesforce.org Elevate and Salesforce.org Philanthropy Cloud.

Security, Privacy & Architecture

- **Services Covered**: Added Salesforce.org Philanthropy Cloud to the list of Covered Services. Noted that Salesforce.org Philanthropy Cloud also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications**: Noted which audits and certifications apply to Salesforce.org Philanthropy Cloud.
- **Return of Customer Data**: Described the method and timing for requesting return of Customer Data for customers of Salesforce.org Philanthropy Cloud.
- **Sensitive Data**: Added the terms under which payment card data may be submitted to Salesforce.org Philanthropy Cloud.

**November 17, 2020**

**Information & Sub-processors**
- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.

**Notices & License Information - Quip only**
- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.

**Security, Privacy & Architecture**
- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.

**September 11, 2020**

**Information & Sub-processors**
- **Scope**: Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.

**Notices & License Information - Quip only**
- No material changes

**Security, Privacy & Architecture**
- **Audit and Certifications**: Updated the link to the scope of Salesforce’s ISO certification for Quip and added the certificate number.
- **Security Controls**: Amended certificate types in use to secure site URL access.
- **Intrusion Detection**: Clarified who monitors the Covered Services for unauthorized intrusions.

**July 30, 2020**

**Information & Sub-processors**
- **Sub-processors — Customer Data Storage**: Added Salesforce.org Elevate to the list of Covered Services whose data is hosted by AWS.
- **Sub-Processors — Customer Data Processing**: Added two processors for Salesforce.org Elevate: Heroku, Inc. and Mailgun Technologies, Inc. Noted that services provided by Heroku, Inc. are processed by AWS.

**Notices & License Information - Quip only**
- No changes

**Security, Privacy & Architecture**
- **Scope**: Added Salesforce.org Elevate to the list of “Covered Services”. Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications**: Excluded Salesforce.org Elevate from the scope of Salesforce BCR for Processors, EU-U.S. and Swiss-U.S. Privacy Shield Certification, and APEC Privacy Recognition for Processors. Added the Attestation of Compliance with the Payment Card Industry Data Security Standard for Salesforce.org Elevate.
- **Return of Customer Data**: Described how Salesforce.org Elevate customers can request return of their data upon termination.
- **Sensitive Data**: Clarified when financial information may be submitted to Salesforce.org Elevate.

May 29, 2020

**Information & Sub-processors**

- **Sub-processors - Customer Data Storage**: Clarified hosting location options for Quip customers who have purchased Virtual Private Cloud.

**Security, Privacy & Architecture**

- **Audits and Certifications**: List of services covered by Audits and Certifications has been edited to reflect services covered by this document.
- **User Authentication**: Updated types of identifiers used to manage user’s session.
- **Viruses**: Updated list of services which do not scan for viruses. Added optional virus scanning for Quip customers.
- **Return of Customer Data**: Removed data retrieval methods for discontinued services.
- **Deletion of Customer Data**: Updated list of products for which customer data can be deleted, and the terms and timelines under which it is overwritten or deleted.
- **Sensitive Data**: Amended list of unsubmitable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.
Salesforce Unified Cloud Infrastructure

Salesforce Unified Cloud Infrastructure shares an Information & Sub-processors and Notices & License Information document with Salesforce Services.

January 8, 2021

Information & Sub-processors

- Lists alphabetized for ease of use.
- **Scope**: Added Loyalty Cloud and Einstein Relationship Intelligence to the list of Covered Services. Rebranded Community Cloud as Experience Cloud. Updated the list of related products and features that run across two infrastructures and are therefore also covered under additional documentation.
- **Sub-processors — Customer Data Storage**: Added Australia and US to the list of Amazon Web Services data center locations. Added new instances for data center located in India. Clarified storage redundancy locations for Einstein Relationship Intelligence customers. Clarified storage redundancy locations for Einstein Relationship Intelligence customers. Added Amazon Web Services, Inc. in Germany as a sub-processor for Salesforce Maps.
- **Sub-Processors — Customer Data Processing**: Updated the entity name for the UK Salesforce Affiliate. Added SFDC Austria GmbH as a sub-processor. Updated the list of services and features utilizing Heroku, Inc. as a sub-processor. Added Amazon Web Service, Inc. as a Service Provider for Service Cloud.
- **Content Delivery Networks**: Added Akamai as a CDN for Lightning Experience.

Notices & License Information

- **Services Covered**: Added Loyalty Cloud and Einstein Relationship Intelligence to the list of Covered Services. Rebranded Community Cloud as Experience Cloud. Updated the list of Services and features that run on across more than one infrastructure and are subject to more than one set of documentation.
- **Restricted Uses of Information**: Clarified that ensuring Messages will not be sent to contacts whose status has changed is solely the responsibility of our Customer.
- **Social Accounts, Contacts and Leads Feature**: Updated Twitter terms, and added Twitter terms applicable to public sector users. Added terms for Google API and Rollbar.
- **SOS Feature**: Clarified that SOS is a feature of Service Cloud.
- **Admissions Connect**: Updated terms, removing pdf.js and added Common Application.
- **In-App Learning**: New section describing terms of use for this feature when connecting with Non-SFDC Applications, or with SFDC Services.
- **Insights Platform**: Added Melissa Data terms for global address verification.
- **Salesforce Field Service**: Added terms for integration with Here. Field Service Lightning rebranded as Salesforce Field Service.
- **Workplace Command Center**: Added terms for OpenStreetMap Foundation and The Covid Tracking Project at the Atlantic.

Security, Privacy & Architecture

- Lists alphabetized for ease of use.
- **Services Covered**: Added Einstein Relationship Intelligence.
- **Audits and Certifications**: Reference to UK BCR added. Clarified which audits and certifications applied to Einstein Relationship Intelligence.
- **Reliability, Backup, Business Continuity, and Disaster Recovery**: Clarified that Covered Services’ Disaster Recovery processes use a continually validatable process.
- **Return of Customer Data**: Clarified possible file formats for returned Customer Data. Clarified Customer Data for managed packages may not be available if packages were removed prior to contract termination.
- **Deletion of Customer Data**: Deleted reference to deletion of Customer Data for managed packages as it is addressed with new language in Return of Customer Data above.

**November 15, 2020**

**Security, Privacy & Architecture**

- **Services or Features Not Covered**: Added Salesforce Anywhere (including Quip).

**October 19, 2020**

**Security, Privacy & Architecture**

Initial Publication of Security, Privacy & Architecture document for customers of the above Salesforce Services which are operating on Salesforce Unified Cloud Architecture.

To determine which instance your org is running on, please visit the Salesforce Status website at [https://status.salesforce.com/](https://status.salesforce.com/) and enter your orgID into the search bar.
Salesforce.org Philanthropy Cloud and Elevate

Therefore, some changes may be unrelated to services branded as Salesforce.org Philanthropy Cloud or Elevate.

January 8, 2021

Information & Sub-processors

- **Scope**: Clarified that Customer Data submitted to myTrailhead also uses Heroku infrastructure to host or process Customer Data.
- **Sub-processors – Customer Data Storage**: Clarified that myTrailhead also uses Heroku infrastructure to store Customer Data.
- **Sub-processors – Customer Data Processing**: Added Austria as a salesforce.com, inc. Affiliate entity country. Clarified that data centers for Heroku, Inc. are located in the United States.
- **Content Delivery Networks**: Defined Content Delivery Networks and described their use.

Notices & License Information - Salesforce.org Philanthropy Cloud and Elevate only

- **Payment Gateways**: Updated terms for the payment gateways which can be integrated with the Covered Services.

Security, Privacy & Architecture

- **Services Covered**: Clarified which Covered Services run on more than one platform.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Clarified which sets of documentation apply to this Covered Service.
- **Audit and Certifications**: Reference to UK BCR added.
- **Data Encryption**: Updated the data encryption protocols used to protect Customer Data and communications.
- **Return of Customer Data**: Clarified terms for returning Customer Data per Covered Service.

December 15, 2020

Information & Sub-processors

- **Scope**: Added Salesforce.org Philanthropy Cloud to the list of Covered Services.
- **Sub-processors – Customer Data Storage**: Added AWS as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Sub-processors – Customer Data Processing**: Added Heroku, Inc. and Mailgun Technologies as the sub-processor for Salesforce.org Philanthropy Cloud.
- **Content Delivery Networks**: Added Fastly, Inc. and Cloudinary Ltd. as sub-processors for Salesforce.org Elevate and Salesforce.org Philanthropy Cloud.

Notices & License Information - Salesforce.org Philanthropy Cloud and Elevate only

- **Services Covered**: Added Salesforce.org Philanthropy Cloud to the list of Covered Services.
- **Geographic Limitation**: New section added describing the geographic availability of Salesforce.org Philanthropy Cloud.
- **Salesforce.org Philanthropy Cloud Third-Party Notices**: New section specifying the applicable notices for Third-Party Platforms that interoperate with this Covered Service.
- **Salesforce.org Elevate Third-Party Notices**: New section specifying the applicable notices for Third-Party Platforms that interoperate with this Covered Service, inclusive of the sections formerly titled “Payments” and “Google reCAPTCHA” from the previous version of this document.
- **Receipts**: New section addressing email receipt functionality for the Covered Services and applicable laws and regulations.
- **Distributed Software**: Added EULA and/or Order Form Supplements for Salesforce for iOS, Android, and Windows.

**Security, Privacy & Architecture**

- **Services Covered**: Added Salesforce.org Philanthropy Cloud to the list of Covered Services. Noted that Salesforce.org Philanthropy Cloud also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications**: Noted which audits and certifications apply to Salesforce.org Philanthropy Cloud and Salesforce.org Elevate.
- **Return of Customer Data**: Described the method and timing for requesting return of Customer Data for customers of Salesforce.org Philanthropy Cloud.
- **Sensitive Data**: Added the terms under which payment card data may be submitted to Salesforce.org Elevate and added the same for Salesforce.org Philanthropy Cloud.

**November 17, 2020**

**Information & Sub-processors**

- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.

**Security, Privacy & Architecture**

- References to Quip replaced with “Salesforce Anywhere (including Quip)” throughout the document, in line with Service rebranding.
- **Salesforce Anywhere (including Quip) Accessed Through Other Services**: Added section specific to Salesforce Anywhere (including Quip) specifying that it runs on two infrastructures and thus is subject to additional documentation.

**September 11, 2020**

**Information & Sub-processors**

- **Scope**: Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.

**Notices & License Information - Salesforce.org Elevate only**

- **Google reCAPTCHA**: Terms and notices for this third-party integration were added.

**Security, Privacy & Architecture**

- **Audit and Certifications**: Updated the link to the scope of Salesforce’s ISO certification for Quip and added the certificate number.
- **Security Controls**: Amended certificate types in use to secure site URL access.
- **Intrusion Detection**: Clarified who monitors the Covered Services for unauthorized intrusions.

**July 30, 2020**

Initial Publication of Salesforce.org Elevate Trust & Compliance Documentation
Information & Sub-processors

- **Sub-processors — Customer Data Storage:** Added Salesforce.org Elevate to the list of Covered Services whose data is hosted by AWS.
- **Sub-Processors — Customer Data Processing:** Added two processors for Salesforce.org Elevate: Heroku, Inc. and Mailgun Technologies, Inc. Noted that services provided by Heroku, Inc. are processed by AWS.

Notices & License Information

- New document

Security, Privacy & Architecture

- **Scope:** Added Salesforce.org Elevate to the list of “Covered Services”. Noted that Salesforce.org Elevate also uses infrastructure provided by Heroku, Inc. and the Salesforce Services and is therefore subject to both sets of Documentation.
- **Audits and Certifications:** Excluded Salesforce.org Elevate from the scope of Salesforce BCR for Processors, EU-U.S. and Swiss-U.S. Privacy Shield Certification, and APEC Privacy Recognition for Processors. Added the Attestation of Compliance with the Payment Card Industry Data Security Standard for Salesforce.org Elevate.
- **Return of Customer Data:** Described how Salesforce.org Elevate customers can request return of their data upon termination.
- **Sensitive Data:** Clarified when financial information may be submitted to Salesforce.org Elevate.
Salesforce Services

January 8, 2021

Information & Sub-processors
- Lists alphabetized for ease of use.
- **Scope:** Added Einstein Relationship Intelligence, Experience Cloud and Loyalty Cloud to the list of Covered Services. Rebranded Community Cloud as Experience Cloud. Updated the list of related products and features that run across two infrastructures and are therefore also covered under additional documentation.
- **Sub-processors – Customer Data Storage:** Added new Instance for customers in the Americas region. Added Australia and US to the list of Amazon Web Services data center locations. Added Amazon Web Services, Inc. in Germany as a sub-processor for Salesforce Maps. Added new instances for data center located in India. Clarified storage redundancy locations for Einstein Relationship Intelligence customers.
- **Sub-Processors – Customer Data Processing:** Updated the entity name for the UK Salesforce Affiliate. Added SFDC Austria GmbH as a sub-processor. Updated the list of services and features utilizing Heroku, Inc. as a sub-processor. Added Amazon Web Service, Inc. as a sub-processor to calculate routes for Field Service.
- **Content Delivery Networks:** Added Akamai as a CDN for Lightning Experience.

Notices & License Information
- **Services Covered:** Added Loyalty Cloud and Einstein Relationship Intelligence to the list of Covered Services. Rebranded Community Cloud as Experience Cloud. Updated the list of Services and features that run on across more than one infrastructure and are subject to more than one set of documentation.
- **Restricted Uses of Information:** Clarified that compliance with external “do not contact” lists for sending Messages is solely the responsibility of our Customer.
- **Social Accounts, Contacts and Leads Feature:** Updated Twitter terms, and added Twitter terms applicable to public sector users. Added terms for Google API and Rollbar.
- **SOS Feature:** Clarified that SOS is a feature of Service Cloud.
- **Admissions Connect:** Updated terms, removing pdf.js and added Common Application.
- **In-App Learning:** New section describing terms of use for this feature when connecting with Non-SFDC Applications, or with SFDC Services.
- **Insights Platform:** Added Melissa Data terms for global address verification.
- **Salesforce Field Service:** Added terms for integration with Here. Field Service Lightning rebranded as Salesforce Field Service.
- **Workplace Command Center:** Added terms for OpenStreetMap Foundation and The Covid Tracking Project at the Atlantic.

Security, Privacy & Architecture
- Lists alphabetized for ease of use.
- **Services Covered**: Added Loyalty Cloud to the list of Covered Services. Rebranded Community Cloud as Experience Cloud. Clarified Covered and excluded Services. Clarified which Covered Services run on more than one platform.
- **Audits and Certifications**: Reference to UK BCR added and link updated. Clarified which Covered Services and features are included or excluded from listed audits and certifications.
- **Deletion of Customer Data**: Clarified how and when Self-Hosted Data for Salesforce Maps is deleted. Updated the data retention duration, and clarified the deletion terms for Customer Data submitted via Insights Platform.

**December 15, 2020**

**Information & Sub-processors**
- **Scope**: Added Intelligent Form Reader and Student Success Hub to the list of Covered Services.
- **Sub-Processors – Customer Data Processing**: Added Amazon Web Service, Inc. as the sub-processor for Intelligent Form Reader.

**Notices & License Information**
- **Services Covered**: Added Intelligent Form Reader and Student Success Hub to the list of Covered Services.
- **Intelligent Form Reader**: Added new section describing the integration of Intelligent Form Reader and AWS Textract services, and related terms.

**Security, Privacy & Architecture**
- **Services Covered**: Added Intelligent Form Reader and Student Success Hub to the list of Covered Services.
- **Audits and Certifications**: Noted which audits and certifications applied to Intelligent Form Reader and Student Success Hub.
- **Reliability and Backup**: Added Intelligent Form Reader and Student Success Hub to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.
- **Sensitive Data**: Additional requirement added for human oversight when using Intelligent Form Reader as part of a decision-making process with legal or similarly significant effects.

**November 17, 2020**

**Information & Sub-processors**
- **Scope**: Added Admissions Connect to the list of Covered Services. Added clarification on how using Salesforce Anywhere (including Quip) Services with Salesforce Services can replicate Customer Data onto Salesforce Anywhere’s AWS-powered infrastructure.

**Notices & License Information**
- **Services Covered**: Added Admissions Connect to the list of Covered Services.
- **Admissions Connect**: Added new section detailing applicable terms and licensing for customer use of third-party applications in conjunction with the Service.

**Security, Privacy & Architecture**
- **Services Covered**: Added Admissions Connect to the list of Covered Services. Added clarification on how using Salesforce Anywhere (including Quip) Services with Salesforce Services can replicate Customer Data onto Salesforce Anywhere’s AWS-powered infrastructure.
- **Audits and Certifications**: Noted which audits and certifications applied to Admissions Connect. Added Accounting Subledger, Insights Platform, and Nonprofit Cloud Case Management to the scope of Salesforce BCR for Processors.
- **Reliability and Backup**: Added Admissions Connect to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.
November 5, 2020

Information & Sub-processors
● **Scope**: Added Grants Management to the list of Covered Services.

Notices & License Information
● **Services Covered**: Added Grant Management to the list of Covered Services.
● **Restricted Uses of Information**: New section added to the document.

Security, Privacy & Architecture
● **Services Covered**: Added Grants Management to the list of Covered Services.
● **Audits and Certifications**: Noted which audits and certifications applied to Grants Management.
● **Reliability and Backup**: Added Grants Management to the list of services for which customer data may not be restorable if Customer’s administrator uninstalls the service during their subscription.

October 19, 2020

Information & Sub-processors
● **Scope**: Added Privacy Center, and Public Sector Solutions to the list of Covered Services.
● **Sub-Processors – Customer Data Storage**: Added additional data centers in the APAC region for customers using services residing on the Salesforce Unified Computing Infrastructure. Added a section describing that a customer’s configuration of Security Center can affect where certain customer data is stored.
● **Sub-Processors – Customer Data Processing**: Added Privacy Center to the list of services utilizing Heroku, Inc.’s data center.

Notices & License Information
● **Services Covered**: Added Privacy Center, and Public Sector Solutions to the list of Covered Services.

Security, Privacy & Architecture
● **Services Covered**: Added Privacy Center, and Public Sector Solutions to the list of Covered Services.
● **Audits and Certifications**: Privacy Center and Public Sector Solutions are excluded from some of the listed audits and certifications.

October 12, 2020

Security, Privacy & Architecture
● **Audits & Certifications**: Updated references to FS and FSMP.

October 7, 2020

Information & Sub-processors
Rebranded all instances of Field Service Lightning as Field Service.

Notices & License Information
Rebranded all instances of Field Service Lightning as Field Service.

Security, Privacy & Architecture
Rebranded all instances of Field Service Lightning as Field Service. Replaced all “FSL” abbreviations with “FS”, or for Field Service managed packages, “FSMP”.
September 11, 2020

Information & Sub-processors
- **Scope**: “Covered Services” was amended to include both services and managed packages. Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation.
- **Sub-Processors** — Customer Data Processing: Changed “User Guide” to “Documentation”. Removed four sub-processors: Cognizant Technology Solutions U.S. Corporation, Cognizant Technology Solutions Hungary Kft, Environmental Systems Research Institute, Inc., and HERE Global B.V. Added Salesforce Private Connect (US only), Shift Management, and the services supported by ClickSoftware, Inc. to the list of services being processed by Amazon Web Services, Inc.

Notices & License Information
- **Services Covered**: Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation.
- **Salesforce Essentials**: Added notices for third-party applications which interoperate with this Service.
- **Distributed Software**: Added the End User License Agreement / Order Form Supplement for Salesforce Field Service Lightning Mobile App for Android.

Security, Privacy & Architecture
- **Services Covered**: Simplified the description of the Field Service Lightning Covered Service. Clarified the list of products and features which run on two infrastructures and thus are subject to additional documentation. Removed reference to Insights Platform running on both Heroku platform and AWS.
- **Third-Party Functionality**: More clearly defined the Account Intelligence feature in Sales Cloud.
- **Audits and Certifications**: Updated the Services covered or excluded by the listed audits and certifications. Updated the list of Services using Amazon Web Services, Inc.’s or Heroku’s infrastructures to host or process Customer Data.
- **Security Controls**: Updated the list of Services subject to Amazon Web Services, Inc.’s or Heroku’s security documentation.
- **Incident Management**: Updated the link to the Salesforce Trust website.
- **User Authentication**: Clarified that Community Cloud guest users are not required to authenticate with one of the listed methods when accessing that Service.
- **Disaster Recovery**: Clarified that this section does not apply to Shift Management.
- **Return of Customer Data**: Removed reference to derived data sourced from other Services in use by the Customer.
- **Deletion of Customer Data**: Clarified Salesforce Maps data retention duration.
- **Sensitive Data**: Clarified further the restriction on submission of Protected Health Information (defined under US HIPAA) by customers using covered services that are hosted on public cloud provider’s infrastructure.

July 24, 2020

Notices & License Information
- Added entities and notices for Workplace Command Center.

July 21, 2020

Information & Sub-processors
- Updated to add Service Cloud Voice as a Covered Service.
- Updated to add Salesforce Private Connect as a Covered Service.
- Updated to add B2B Commerce on Lightning Experience as a Covered Service.
- **Sub-Processors** — **Customer Data Processing**: Added Amazon Web Services, Inc. as a processor with locations in the United States, Germany, Australia, Japan, and Ireland. Added Service Cloud Voice to the
list of services being processed by Heroku, Inc. and Amazon Web Services, Inc. Added Amazon Web Services, Inc. as a sub-processor, supporting Salesforce Private Connect (US only) and Service Cloud Voice.

**Notices & License Information**

- Updated to add Service Cloud Voice as a Covered Service.
- Updated to add Salesforce Private Connect as a Covered Service.
- Updated to add B2B Commerce on Lightning Experience as a Covered Service.
- **Salesforce Private Connect**: Added notices for third-party applications which interoperate with this Service.
- **Service Cloud Voice with Amazon Connect**: Added notices for third-party applications which interoperate with this Service.

**Security, Privacy & Architecture**

- Updated to add Service Cloud Voice as a Covered Service.
- Updated to add Salesforce Private Connect as a Covered Service.
- Updated to add B2B Commerce on Lightning Experience as a Covered Service.
- **Audits and Certifications**: Updated the Services covered or excluded by the listed audits and certifications. Updated the list of Services using Amazon Web Services, Inc.’s or Heroku’s infrastructures to host or process Customer Data.
- **Security Controls**: Updated the list of Services subject to Amazon Web Services, Inc’s or Heroku’s security documentation.

**June 25, 2020**

**Notices & License Information**

**May 29, 2020**

**Information & Sub-processors**

- **Scope**: Added the following additional Covered Services to the scope of this document: Emergency Program Management, Accounting Subledger, Salesforce.org Insights Platform: Data Integrity, Nonprofit Cloud Case Management, Command Center, and Shift Management. Rebranded all instances of Work.com (provisioned before May 1, 2020) as WDC. References to Einstein Discovery Classic were removed. Clarified that document does not apply to B2C Order Management. Clarified that Insights Platform is also subject to the Trust and Compliance Documentation for Heroku. Added a link to Salesforce’s Data Processing Addendum for further information on capitalized terms.
- **Sub-Processors - Customer Data Storage**: In the Americas, added a GS0 (Trials only) Instance in two United States-based Data Centers, which are hosted by salesforce.com, inc. and Amazon Web Services.
- **Sub-Processors - Customer Data Processing**: Insights Platform was added to the list of services that use Heroku, Inc. as a sub-processor. Bugsnag Inc. was added as a sub-processor for Salesforce Maps. Shift Management was added to the list of features that use ClickSoftware, Inc. as a sub-processor.

**Notices & License Information**

- **Services Covered**: Added new services including: Salesforce Order Management, Emergency Program Management, Accounting Subledger, Salesforce.org Insights Platform: Data Integrity, Nonprofit Cloud Case Management, Workplace Command Center, and Shift Management. Differentiates Salesforce Order Management from B2C Commerce Order Management and the documentation that governs each. Rebranded all instances of Work.com (provisioned before May 1, 2020) as WDC.
- **Field Service Lightning**: Section removed.
- **Google Maps**: Simplified and clarified terms of use. Updated links to salient Google policies.
- **Insights Platform**: Added terms for integrating Insights Platform and Melissa Data.
- **Workplace Command Center**: Added Third Party Platforms disclosure.
● **Distributed Software**: removed reference to former WDC mobile app.

● **External Resources**: Clarifies Salesforce’s relationship with, and limits its liability in relation to, referenced sites or resources.

**Security, Privacy & Architecture**

● **Services Covered**: Added new services including: Emergency Program Management, Salesforce Order Management, Accounting Subledger, Salesforce.org Insights Platform: Data Integrity, Nonprofit Cloud Case Management, Workplace Command Center, and Shift Management. Differentiates Salesforce Order Management from B2C Commerce Order Management and the documentation that governs each. Clarified which sections of the document apply to Scratch Orgs. Clarifies additional governing documentation for Field Service Lighting feature, the Insights Platform, and services which integrate with the Covered Services. Clarified which versions of Einstein Discovery are included in Covered Services. Rebranded all instances of Work.com (provisioned before May 1, 2020) as WDC.

● **Third-Party Functionality**: Added WhatsApp to the list of over-the-top messaging services.

● **Audits and Certifications**: Updated list of services excluded from each referenced certification. Updated location where customers can access SOC reports. Removed Industry Cloud from the list of products certified by Japan CS Gold. Updated list of services whose data is hosted or processed on AWS infrastructure. Added a section describing Insights Platform use of Heroku’s architecture for hosting or processing data.

● **Security Controls**: Updated list of services using AWS. Added Insights Platform’s use of Heroku, and a link to Heroku’s security documentation.

● **Security Policies and Procedures**: Salesforce will only provide log entry records to assist customers in forensic analysis, when available.

● **Reliability and Backup**: Clarifies which Services’ data may be unrecoverable, if uninstalled by customers.

● **Disaster Recovery**: Clarified that this section does not apply to Click FSL Optimizer.

● **Data Encryption**: Clarifies data transmission methods between data centers.

● **Deletion of Customer Data**: Clarifies duration of data retention for Insights Platform on AWS and Heroku servers.

● **Sensitive Data**: Amended list of unsubmittable data types. Clarified Customer responsibilities for ensuring use of services for processing of submitted sensitive or regulated data complies with all applicable laws and regulations.

● **Interoperation with Other Services**: Added description of metadata that may be captured by Salesforce when third-party systems are connected to Covered Services. Addresses protection and use of that data.
Tableau
