Timesheet & Labor Cost Optimization

Optimize labor costs and workforce management

salesforce

Labor cost & management inefficiencies are costly.

Automate and streamline your processes using data & AI for happier mobile workers, improved compliance with union & labor laws & optimized productivity.

1

Technician Experience

Hassle-Free Time Tracking

Effortlessly input, categorize and check time - including breaks, drive time, overtime and vehicle used. Geolocation prompted check in/out, site survey, health and safety review, etc. All in the same app - even when offline!

2

Business Rules Engine

Calculate & Validate Labor Rules

Ensure compliance with labor laws and union rules using Business Rules Engine. Calculate & flag timesheet entries that do not pass compliance and automate rules-based reward allocation.

3

Connected Data Model

Unified Operations Data

Easily integrate ERP system data, fleet management data, labor union rules, projects & work orders data into one view for full & accurate visibility into operations and costs.

4

Crew Lead

Smart Reviewing, Editing & Approval

Easily review, edit & approve submitted time, cost centers, job codes, and pay types in bulk. Receive notifications for fields needing edits, ensuring accuracy and compliance.

5

Supervisor & Business Leader

Boost Compliance & Productivity

Improve data accuracy with automation & AI in the flow of your crews' daily routine - enabling you to improve compliance to labor laws and make insight-based decision on your workforce productivity.

Why Timesheet & Labor Cost Optimization?

68%

Of field technician time is **spent on admin tasks** putting paperwork ahead of actual work.*

94%

of business leaders believe they should be getting **more value from their data**
