

# Scale and secure apps on a FedRAMP High-authorized government cloud.

The U.S. Government and government contractors are faced with unique challenges. They are tasked with handling and protecting sensitive data in the face of increasing cybersecurity threats while also meeting compliance mandates in an evolving regulatory landscape.

To help federal agencies and its supporting organizations protect sensitive data in the cloud, the government wide program, Federal Risk and Authorization Management Platform (FedRAMP), mandates a standardized approach to security assessment and authorization for cloud products and services.

Salesforce Government Cloud Plus is a dedicated environment built on AWS GovCloud (US) and operated by qualified U.S. citizens. It is designed to help U.S. federal, state, and local agencies, as well as their contractors, scale and secure AI agents and applications on a FedRAMP High-authorized platform. With Government Cloud, public sector organizations can reduce compliance burdens and risks while delivering best-in-class service and prioritize what matters most: delivering on the mission.

## Drive mission success now with cloud-first IT innovation.

### Unlock Compliance

Help meet compliance requirements such as FedRAMP High, IRS 1075, HIPAA, and NIST SP 800-171.

### Innovate Faster

Save time and money on deployment and maintenance with best-practice industry apps and no-code tools.

### Operate with Confidence

Unlock real-time insights on system and security performance at [trust.salesforce.com](https://trust.salesforce.com).

### Get Ready for Mission Success

Accelerate time-to-value with professional services, implementation partners, system integrators, and other technology providers specializing in government.

## Market Leading Compliance Infrastructure

### Compliant Environment:

Built on AWS GovCloud (US) and designed to meet stringent unclassified security and compliance requirements of the U.S. Government.

### Strong Encryption:

Full data encryption at rest and end to end encryption, and authentication of both users and Salesforce personnel.

### Ongoing Security Vigilance:

Rigorous security monitoring and remediation program aligned with FedRAMP High - including annual third party assessments (3PAO) to evaluate security controls.

## Located and Operated in the United States

### Designed for the U.S. Government:

Dedicated infrastructure for use only by United States' federal, state, and local agencies, government contractors, and aerospace and defense organizations.

### Data Centers Located in the U.S.:

Customer data is processed and stored solely within the continental U.S.

### Managed by U.S. Citizens:

Operated and supported by screened and qualified U.S. citizens.

## Success Plans for Government Cloud Plus

### Drive Adoption:

Maximize your Salesforce ROI with step-by-step guidance and best practices from the Premier Success Plan ([sfdc.co/premiersuccessplans](https://sfdc.co/premiersuccessplans)) to get your teams up to speed quickly and confidently.

### Get Expert Guidance:

Find answers fast with 24x7 expertise from our U.S. Citizen support team. Receive personalized guidance from your designated Technical Account Manager(s) with the Signature Success Plan ([sfdc.co/signaturesuccessplan](https://sfdc.co/signaturesuccessplan)).

### Boost Productivity:

Increase system performance with health checks from Premier. Minimize risks to drive stability and security with Proactive Monitoring from Signature.
