Salesforce Message Credits - RCS

Salesforce Message Credits - RCS (1,000) must be purchased as an add-on to eligible Marketing Cloud Growth, Marketing Cloud Advanced, or Marketing Cloud Engagement+ subscriptions.

The multiplier applied to each RCS message is determined by country destination, message direction, Usage Type, and network type (Domestic/International), for each individual message delivered, according to the table below.

RCS messages can only be sent to a supported country using an assigned RCS Agent mapped to that country. All RCS messages sent to countries not listed in the table below will be charged at a multiplier of 90.25.

Additionally:

- Customers will be charged for all outbound, mobile terminated (MT) RCS messages, on delivery.
- Where supported, Customers will be charged for inbound, mobile originated (MO) RCS messages. All MO messages will be charged a multiplier applicable for that country.
- Multipliers noted as Domestic in the table below apply only to Customers who applied for and were approved by carrier(s) as being eligible for domestic sending, and send RCS through domestic gateways using pre-registered RCS Agents. Eligibility for Domestic multiplier rates is determined based on various factors at the discretion of the carrier and is subject to change at any time.

Multipliers, countries and usage types are subject to change at any time.
TABLE BELOW EFFECTIVE AS OF November 14, 2026:

ISO	Country Destination	Usage Type	Multiplier
