

Rate Card – Effective December 1, 2024

This Rate Card is applicable to WhatsApp Chat Messages (1,000) and WhatsApp Conversations (1,000). Customers using WhatsApp Chat Messages (1,000) or WhatsApp Conversations (1,000) will be charged per 24-hour conversation, with the applicable multiplier rate based on category conversation template and the message recipient's country code. Additional WhatsApp Chat Messages (1,000) or WhatsApp Conversations (1,000) can be purchased during the Order Term. Customers do not consume WhatsApp Chat Messages or WhatsApp Conversations messages for inbound WhatsApp messages sent by users.

For the purposes of this Rate Card, references to "user" means a recipient of a WhatsApp message sent by Customer, or a person who sends a WhatsApp message to Customer.

Category Conversation Templates:

There are currently 4 Category Conversation Templates, 3 of which are business-initiated and one of which is user-initiated, and described as follows:

Business-initiated conversations begin when the Customer sends an outbound, approvedBusiness initiated conversation template message. Business-initiated conversations will consume multipliers based on the following three conversation category templates (all of which require user opt in):

1. **Utility conversations** - Facilitate a specific, agreed-upon request or transaction or update to a user about an ongoing transaction, including post-purchase notifications and recurring billing statements.
2. **Authentication conversations** - Enable businesses to authenticate users with one-time passcodes, potentially at multiple steps in the login process (e.g., account verification, account recovery, integrity challenges).
3. **Marketing conversations** - Include promotions or offers, informational updates, or invitations for customers to respond / take action. Any conversation that does not qualify as utility or authentication is a marketing conversation.

All **User-initiated conversations** will fall into a fourth category, **Service conversations**, which help Customers resolve user enquiries. Service conversations will only be initiated when no other conversation window is open and a Customer responds to a user with a non-templated (freeform) message within the 24-hour customer service window.

Customer Service Window

As long as it has been less than 24 hours since a user last messaged the Customer, the Customer can respond with free form messages. If it has been more than 24 hours since a user last messaged a Customer, Customers are outside the customer service window and must use a message template. During a customer service window, if a Customer replies to a user with a template message or sends a template message in an open service conversation, this opens a new conversation based on the template category and will consume the multiplier aligned to that conversation template.

How Conversation Multipliers are Consumed

When a template is delivered, it opens a new conversation of that category and Customer consumes the multiplier of that conversation category, unless the template is delivered during an open

conversation of that category. For example, if a utility conversation is open and a marketing template is delivered within that open conversation, a new, separate marketing conversation is opened and the marketing conversation multiplier is consumed.

If Customer sends multiple templates of the same category within an open conversation, Customer will not consume additional multipliers. For example, a business can send multiple utility templates in an open utility conversation with no additional entitlement consumption.

Free Entry Point/Referral Message Types

Customers are not charged for free entry point conversations, also known as Referral Conversations.

Referral Conversations are when users message Customers using call-to-action buttons on Ads that Click to WhatsApp or Facebook Page call-to-action buttons.

When a free entry point conversation is open, no other conversation category multiplier will be consumed, even if a Customer sends a template within the three-day (72h) free entry point conversation window.

*Standard pricing applies for Ads that Click to WhatsApp. The conversation that initiates from the ad is free, but not the ad itself.

Multiplier Rates by Recipient Location
