

## Implement: Security Center + Shield

# Security and compliance, built in from the start.

Scale on Salesforce with confidence – your data is protected, compliance is simplified, and customer trust stays strong, all set up according to best practices from day one.

### Here's how we'll work together

We start by helping you bring your security tools together with Security Center and Shield so you can see and manage protection in one place. As your business grows, we guide best practices to keep your data protected, compliance simple, and your systems secure over time.

#### See and manage everything in one place.

Get a unified, easy-to-manage view across Salesforce orgs – configured with Security Center to simplify oversight and keep your environment protected.

#### Protect data and keep business moving.

Safeguard sensitive information with the right access, monitoring, and controls – implemented with Salesforce Shield best practices so teams stay productive.

#### Make compliance effortless and stay audit-ready.

Be audit-ready with pre-built policies and guided setup – reducing complexity, meeting regulatory requirements, and maintaining customer trust.
