Revised Section 508 Report

Notes:

Chapter 3: [Functional Performance Criteria \(FPC\)](#)

Notes:

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially Supports	Experience Cloud - Aura (Desktop and Web Mobile) uses standard platform attributes to describe the identity, operation, and state of user interface elements to assistive technologies. The core features and controls in Mobile are reachable using the linear swiping alone and announced by assistive technology. However, there are some exceptions. Refer to the WCAG 2.x section for details.
302.2 With Limited Vision	Partially Supports	Experience Cloud - Aura (Desktop and Web Mobile) supports standard browser magnification and contrast adjustments. Experience Cloud - Aura (Desktop and Web Mobile) is compatible with assistive technologies and supports the use of screen readers for the visually impaired. However, there are some exceptions. Refer to the WCAG 2.x section for details.
302.3 Without Perception of Color	Partially Supports	Experience Cloud - Aura (Desktop and Web Mobile) does not use color as the only means of conveying information. Color is only used as a decorative or supplemental attribute of user interface elements. Textual representation is always used as the primary mechanism for conveying information. However, there are some exceptions. Refer to the WCAG 2.x section for details.
302.4 Without Hearing	Not Applicable	Experience Cloud - Aura (Desktop and Web Mobile) does not include audio-only features that require hearing to be used.
