

Salesforce Accessibility Conformance Report International Edition

VPAT[®] (Voluntary Product Accessibility Template[®]) version 2.5

Name of Product/Version:	CSV Data Import / Summer '25
Report Date:	May 2025
Product Description:	<p>The CSV Data Import experience for Industries provides a streamlined interface under a dedicated tab within Salesforce, enabling both simple and advanced data import workflows. In the Simple CSV Import flow, users can upload a CSV file to import data into a single Salesforce object. They can customize import settings by selecting delimiters, previewing data, and mapping CSV columns to Salesforce fields. The tool supports insert, update, and upsert operations, and allows users to save and reuse field mappings to improve efficiency and consistency in recurring imports.</p> <p>For more complex scenarios, the Advanced Import option allows importing data from a single CSV file into multiple related objects using a predefined Data Processing Engine (DPE) definition—created by a system or data admin. Business users can simply upload their sheet, choose the relevant DPE definition, and run the import. All import runs are tracked in an Audit Log, which records when imports were initiated, their status, and provides downloadable CSVs of both successful and failed records. This ensures traceability and transparency for data operations across teams.</p>
