

Chapter 7: Future-proof your business with EGI-readiness

The future of AI for business—Enterprise General Intelligence (EGI) —is coming. Use these questions to begin discussions with your teams on your business’s preparedness, and gain a competitive edge.

Prepare your organization for:

Multi-Agent Ecosystems

Consider these questions:

- What business processes could benefit from multi-agent collaboration?
- Do your data systems support secure, governed agent information sharing?

Robotics and AI

Consider these questions:

- Which physical processes could benefit from AI automation?
- How might you build the infrastructure that supports both digital and physical AI?

EGI-Level AI Systems

Consider these questions:

- How developed is your integrated AI infrastructure and governance framework?
- How might you build the human capabilities needed for effective AI collaboration?
